### What is a Registered Index-Linked Annuity?

Registered Index-Linked Annuities are long-term, tax-deferred vehicles designed for retirement purposes and are not for everyone. They are subject to possible loss of principal and earnings due to market fluctuation, investment risks as a result of fees and charges under the policy, including surrender charges, other transaction charges, and periodic charges.

Additional premiums may be invested in one or more of the selected Allocation Accounts. Growth Opportunity Rates may be higher or lower at the time of the addition.

At the end of a Crediting Period for an Allocation Account, you may choose to reinvest in the same Allocation Account or transfer the Policy Value into another Allocation Account. Growth Opportunity Rates may be higher or lower upon renewal.

You cannot directly invest in an index and the annuity does not participate directly in any stock or equity investments. Stock dividends on the index are not included as a component of the Index Value.

Transamerica reserves the right to add, remove, or suspend any index and/or Index Account Option(s). Not all Indexes and/or Index Account Option(s) will be available at all times. Please consult with your financial professional or the prospectus.

When you exercise the Performance Lock, known as Interim Value Lock in your policy, your Interim Value will be "locked-in" with no credit advantage, or fees, and your investment will be transferred to a holding account (Performance Lock Account) until the next anniversary of the Crediting Period. While in the holding account, you will be credited compound interest daily based on the annual interest rate in effect on that day and will be reduced on a dollar for dollar basis for any withdrawals deducted from the Performance Lock Account. If you exercise Performance Lock when the Interim Value is lower than your initial investment, you may be locking-in a loss.

Withdrawals of taxable amounts are subject to ordinary income tax and may be subject to a 10% additional federal tax if withdrawn before age 59½.

Subsequent rates may be higher or lower than the initial rates and may differ from those used for new contracts or for contracts issued at different times. Declared rates will not be lower than the minimum guarantees. See prospectus.

All guarantees, including optional benefits, are based on the claims-paying ability of the issuing insurance company.

Financial institutions may have their own guidelines to determine the appropriateness of our products, investment options and/or benefits. Some financial institutions may have specific issue ages and may not have all benefits or investment options available.
