TRANSAMERICA®

Dear Valued Client,

Markets can be unpredictable, but your retirement planning doesn't have to be. Creating a diversified portfolio of proven investment strategies may provide the confidence you need to reach your goals.

The Transamerica Asset Allocation - Moderate Portfolio is designed to provide a diversified portfolio of underlying funds with proven track records across multiple asset classes. Goldman Sachs Asset Management, L.P. (Goldman Sachs), serves as sub-adviser to the fund.

The enclosed proposal includes:

- **AN OVERVIEW OF THE TRANSAMERICA ASSET ALLOCATION - MODERATE PORTFOLIO**
- **QUARTERLY PORTFOLIO HOLDINGS AND ALLOCATIONS**
- **PORTFOLIO PERFORMANCE HISTORY**

Please let me know if you would like more information on this strategy.

Sincerely,

YOUR FINANCIAL PROFESSIONAL

OVERVIEW

OBJECTIVE	The fund seeks capital appreciation and current income.																								
STRATEGY	The fund’s sub-adviser, Goldman Sachs, follows an investment process that involves longer-term portfolio positioning through strategic asset allocation and dynamic asset allocation to pursue shorter-term opportunities based on the sub-adviser’s views of current market conditions.																								
MANAGEMENT	The fund’s investment manager, Transamerica Asset Management, Inc., has chosen Goldman Sachs to serve as sub-adviser to the fund.																								
SELECTING UNDERLYING FUNDS	The fund seeks to achieve its investment objective by investing its assets primarily in a broad mix of Transamerica funds and up to 10% in unaffiliated exchange-traded funds. Under normal circumstances, investments in underlying funds are expected to achieve a mix of approximately 50% of net assets in equities and 50% of net assets in fixed income securities. The sub-adviser determines which underlying funds it wishes to utilize to allocate the fund’s assets. Allocation among the underlying funds is based on factors such as diversification, general market views and outlooks, volatility in the equity markets, historical performance, current valuations, and other global economic factors.																								
TARGET ALLOCATIONS FOR ASSET CLASSES	The fund primarily consists of both equity and fixed income funds.

ONGOING MONITORING AND RISK MANAGEMENT	The sub-adviser develops and implements a strategic asset allocation for the fund. Goldman Sachs may adjust the fund’s asset allocation as part of its investment process in response to certain changes in the markets, the economic cycle, and the macroeconomic environment. This dynamic asset allocation may change the fund’s portfolio positioning and may impact the relative weights across asset classes and the allocation to geographies, sectors, and industries.

¹ The underlying fund percentages shown herein are based on each portfolio's market value and are subject to change. Percentages shown are based on the long positions held by the underlying funds. Each portfolio allocates its assets among Class I2 shares of various underlying funds of Transamerica Funds.

Not all share classes are available to investors. Due to rounding, not all allocations for each model will equal 100%.

U.S. allocations may include U.S. territories and possessions.

The Net Other Assets (Liabilities) category may include, but is not limited to, repurchase agreements, reverse repurchase agreements, security lending collateral, forward foreign currency contracts, and cash collateral.

Holdings and weights are subject to change and are not recommendations to buy or sell a security.

PERFORMANCE HISTORY

Hypothetical Growth of \$10,000 Investment

Class A without sales charge 03/01/2002 to 03/31/2024

IMPORTANT INFORMATION

The chart illustrates the performance of a hypothetical \$10,000 investment made in the fund on commencement of operations. Figures include reinvestment of capital gains and dividends, but do not reflect the effect of any applicable sales charges or redemption fees, which would lower these figures. This chart is not intended to imply any future performance of the fund.

As of 12/31/2023

The data shown represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Please see transamerica.com for performance data current to the most recent month-end. The investment return and principal value of mutual funds will fluctuate over time so that shares, when redeemed, may be worth more or less than their original cost. Net asset value (NAV) returns include reinvestment of dividends and capital gains but do not reflect the deduction of any sales charges. If a sales charge had been deducted, the results would have been lower. Public offering price (POP) returns include reinvestment of dividends and capital gains and reflect the maximum sales charge. Performance for other share classes will vary.

The max sales charge for Class A shares is 5.50%.

The gross expense ratio for this fund is 1.06% for Class A shares.

The net expense ratio for this fund is 1.06% for Class A shares.

Performance figures reflect any fee waivers and/or expense reimbursements by the investment manager. Without such waivers and/or reimbursements, the performance would be lower. Future waivers and/or reimbursements are at the discretion of the investment manager. Contractual arrangements, if any, have been made with Transamerica Asset Management, Inc. through 3/1/2025.

IMPORTANT INFORMATION

Mutual funds are subject to market risk, including loss of principal. Past performance is not indicative of future results.

Mutual funds are sold by prospectus. Before investing, consider the funds' investment objectives, risks, charges, and expenses. This and other important information is contained in the prospectus. Please visit transamerica.com or contact your financial professional to obtain a prospectus or, if available, a summary prospectus containing this information. Please read it carefully before investing.

Asset allocation and diversification do not assure or guarantee better performance, cannot eliminate the risk of investment losses, and do not protect against an overall declining market. Fees associated with a fund-of-funds may be higher than with other funds. An investment in the Fund is subject to the risks associated with the underlying funds, including fixed income investing. Fixed income securities are subject to risks including credit risk, interest rate risk, counterparty risk, prepayment risk, extension risk, valuation risk, and liquidity risk. Investments in small-and medium-sized companies present additional risks, such as increased volatility, because their earnings are less predictable, their share price more volatile, and their securities less liquid than larger or more established companies. Investing internationally, globally, or in emerging markets exposes investors to additional risks and expenses such as changes in currency rates, foreign taxation, differences in auditing and other financial standards not associated with investing domestically.

The MSCI World Index is an unmanaged index used as general measures of market performance. It is not possible to invest directly into an index. Calculations assume dividends and capital gains are reinvested and do not include any managerial expenses.

Shares may be sold (or "redeemed") on any day the New York Stock Exchange is open for business. Proceeds from the redemption of shares will usually be sent to the redeeming shareholder within two business days after receipt in good order of a request for redemption. However, Transamerica Funds has the right to take up to seven days to pay redemption proceeds, and may postpone payment under certain circumstances, as authorized by law.

Transamerica Funds are advised by Transamerica Asset Management, Inc. (TAM) and distributed by Transamerica Capital, Inc. (TCI), member of FINRA. Transamerica Companies and Goldman Sachs Asset Management, L.P. are not affiliated companies.
