<sup>&</sup>lt;sup>1</sup> The underlying fund percentages shown herein are based on each portfolio's market value and are subject to change. Percentages shown are based on the long positions held by the underlying funds. Each portfolio allocates its assets among Class I2 shares of various underlying funds of Transamerica Funds.

Asset allocation, like all investment strategies, offers no guarantee of positive returns, and mutual funds are subject to market risk, including loss of principal.

Sector fund investing may result in more volatility than the typical growth stock fund because while individual company stock risk is reduced through diversification, industry risk can be magnified.

Mutual funds are sold by prospectus. Before investing, consider the funds' investment objectives, risks, charges, and expenses. This and other important information is contained in the prospectus. Please visit transamerica.com or contact your financial professional to obtain a prospectus or, if available, a summary prospectus containing this information. Please read it carefully before investing.

Mutual funds are subject to market risk, including loss of principal. Past performance is not indicative of future results.
