FCIUL II

HYPOTHETICAL CLIENT SITUATION OVERVIEW

MATT, 40-YEAR-OLD, IN GOOD HEALTH

- Corporate executive earning **\$350,000** per year
- Contributing maximum to 401(k) and would like to fund a Roth IRA but earns too much to contribute

WANTS

- Life insurance protection
- To set aside additional dollars for supplemental retirement income

ILLUSTRATION DETAILS

Product Risk Class: Preferred Elite | Account Option: Balanced Uncapped Index Account (100%) | Illustrated Rate: 6.57% | Increasing Death Benefit Option

FCIUL POLICY DESIGN

- » **\$25,000** annual premium to age 65 and an initial face amount of **\$449,000**
- » Begin receiving **\$111,804** of tax-free⁵ income starting at age 66 using index loans⁶
- » Cash surrender value of **\$1,388,649** at age 65 to supplement his retirement income
- » Receive **\$2,795,100** of supplemental retirement income from ages 66–90 and is projected to leave a death benefit to his family of **\$581,589** at age 90

This hypothetical example assumes a male, age 40, Preferred Elite risk class, \$250 monthly premium for lifetime, assuming 6.57% index growth rate in the Balanced Uncapped Index Account, and increasing death benefit option. Illustration run on 9/26/2024 and is subject to change.

The example shown is derived from a complete hypothetical illustration which assumes non-guaranteed elements will continue for all years. This is not likely to occur and actual results may be more or less favorable. All non-guaranteed elements are subject to change by the company. Keep in mind that the purpose of hypothetical illustrations is to show how a policy might work under different scenarios, including minimum interest rates at maximum guaranteed charges. Illustrations may not be used to predict or project future policy values.

Prospective policy owners should refer to a complete, personalized hypothetical sales illustration for guaranteed elements and other important information as well as the consumer brochure for the *Transamerica Financial Choice IULSM II*. At the guaranteed minimum interest rate and guaranteed charges, this policy lapses in year 29.

⁵ Clients may access the policy's cash value to receive tax-free supplemental income when needed, as long as the policy is not a modified endowment contract (MEC). Illustrations include hypothetical values that reflect non-guaranteed elements continuing for all years.

⁶ The company reserves the right to discontinue index loans at any time and convert existing index loans to conventional loans.

WANTS

- Access to policy cash value through loans and withdrawals
- LTC Coverage
- Critical Illness protection
- Peace of mind offered through the *Concierge Planning Rider (Concierge PlanningBenefitSM in FL and MD)*

FFIUL II

HYPOTHETICAL CLIENT SITUATION OVERVIEW

MARY, 35-YEAR-OLD, IN GOOD HEALTH

- Primary earner of the household
- Life insurance protection
- Has a budget of **\$300** per month and wants to purchase as much coverage as possible, funding until age 65

ILLUSTRATION DETAILS

Product Risk Class: Preferred Elite | LTC Rider Risk Class: Preferred | Account Option: Global Index Account (100%) | Illustrated Rate: 7.25% | Increasing Death Benefit Option

FFIUL II POLICY DESIGN

- » **\$300** per month Target Face Solve gives her an initial death benefit of **\$374,000** that grows each year as the policy cash value grows through the increasing death benefit
- » When Mary is 70 and has paid in **\$108,000** over 30 years, the policy cash value has grown to **\$208,495**; and after switching the death benefit to level at age 65, the death benefit has grown to **\$582,495**

This hypothetical example assumes a female, age 35, Preferred Elite risk class, \$250 monthly premium for lifetime, assuming 7.25% index growth rate in the Global Index Account, and increasing death benefit option. Illustration run on 9/26/2024 and is subject to change.

The example shown is derived from a complete hypothetical illustration which assumes non-guaranteed elements will continue for all years. This is not likely to occur and actual results may be more or less favorable. All non-guaranteed elements are subject to change by the company. Keep in mind that the purpose of hypothetical illustrations is to show how a policy might work under different scenarios, including minimum interest rates at maximum guaranteed charges. Illustrations may not be used to predict or project future policy values.

Prospective policy owners should refer to a complete, personalized hypothetical sales illustration for guaranteed elements and other important information as well as the consumer brochure for the *Transamerica Financial Foundation IUL[®] II*. At the guaranteed minimum interest rate and guaranteed charges, this policy lapses in year 32.

SCENARIO 1

Mary at age 71 decides she needs to begin taking money out of her policy to supplement her retirement income for the next 20 years.

Mary can take out **\$16,992** annually each year over the next 20 years. The total amount she will be able to access through withdrawals and loans⁷ over that 20-year span is **\$339,840**.

If the policy's Death Benefit Option is not Level when the Company approves the Accelerated Death Benefit request, the Company will change the Death Benefit Option to Level, make any Face Amount changes in accordance with the policy, and adjust the Available Death Benefit accordingly.

SCENARIO 2

At age 70, an unforeseen event happens that qualifies Mary for long term care. Mary has a benefit of **\$582,495** available to her through the Long-Term Care Rider⁸ to help pay for the qualified long term care expenses, which is outlined in her plan of care.

If Mary exhausts her entire benefit of \$582,495, her policy will still have a residual paid-up death benefit of **\$10,000**. This ensures that the policy will not lapse while she is alive.

SCENARIO 3

At age 63 Mary is diagnosed with a qualifying critical illness⁹ that reduces her life expectancy to 10 years, and she files a critical illness claim.

The accelerated payout that Mary would receive in this nonguaranteed example would be **\$286,057**, and the policy's base face amount would be reduced by **\$498,669**.

⁷ Loans, withdrawals, and death benefit accelerations will reduce the policy value and the death benefit and may increase lapse risk. Policy loans are tax-free provided the policy remains in force. If the policy is surrendered or lapses, the amount of the policy loan will be considered a distribution from the policy and will be taxable to the extent that such loan plus other distributions at that time exceed the policy basis.

⁸ Benefits paid under the LTC Rider will reduce the life insurance policy's death benefit and Cash Surrender Value. Policy owners should consider whether their life insurance needs would still be met if LTC Rider benefits are paid out in full. There is no guarantee that the LTC Rider will cover all of the costs associated with long term care that the insured incurs during the period of coverage.

⁹ Benefits provided through the Critical, Chronic, and Terminal Illness Accelerated Death Benefit Riders are subject to certain limitations and exclusions. The actual benefit paid to the policy owner will be less than the amount that is accelerated because the amount is discounted to reflect early payment of the policy's death benefit. Administrative fees per request apply. Amounts payable under the Critical and Chronic Illness Riders vary based in part on the nature and severity of the insured's health condition and the insured's remaining life expectancy at the time of the acceleration as determined by the company. Riders should not be the sole basis to purchase any life insurance policy. Benefits paid under accelerated death benefit riders will reduce the life insurance policy's death benefit and policy value. Consideration should be given to whether life insurance needs would still be met if rider benefits are paid out in full.

The Fidelity Small-Mid Multifactor IndexSM 5% ER, also called the Fidelity SMID Multifactor IndexSM, (the "Index") is a product of Fidelity Product Services LLC ("FPS"). It is a rules-based index that utilizes a dynamic asset allocation approach which blends multiple factors with the characteristics of stocks of small and mid-capitalization U.S. companies along with U.S. Treasuries, which may reduce volatility over time. Fidelity is a trademark of FMR LLC. The Index has been licensed for use for certain purposes by Transamerica Life Insurance Company ("the Company") on behalf of the *Transamerica Financial Choice IULSM II* or *Transamerica Financial Foundation IUL® II* (each a "policy"). This index is based on an excess return design, meaning that index returns are netted against a risk-free return. It is a volatility controlled index, which means that the index composition will change over time and in particular when market volatility changes. The effect of the excess return design and the volatility control may limit returns when equity index returns are high.

FPS does not make any warranty or representation as to the accuracy, completeness, or availability of the Index or information included in the Index and shall have no responsibility or liability for the impact of any inaccuracy, incompleteness, or unavailability of the Index or such information. Neither FPS nor any other party involved in, or related to, making or compiling the Index makes any representation or warranty, express or implied, to the policy owner, the Company, or any member of the public regarding the advisability of purchasing life insurance generally or the policy particularly, the legality of the policy under applicable federal securities, state insurance and tax laws, the ability of the policy to track the performance of the Index, any other index or benchmark or general market or other asset class performance, or the results, including, but not limited to, performance results, to be obtained by the Company, the policy, policy owners, or any other person or entity. FPS does not provide investment advice to the Company with respect to the policy, or to the policy owners.

The Company exercises sole discretion in determining whether and how the policy will be linked to the value of the Index. FPS does not provide investment advice to the policy owners, nor to any other person or entity with respect to the Index and in no event shall any policy owner be deemed to be a client of FPS. Neither FPS nor any other party involved in, or related to, making or compiling the Index has any obligation to continue to provide the Index to the Company with respect to the policy.

The increasing death benefit option will result in higher monthly deductions over the life of the policy than the level death benefit option.
