

# DAT API Integrations

## Direct access to the industry's most trusted freight data

DAT APIs put market intelligence straight into your workflow. Eliminate manual lookups, speed up decisions, and give your teams reliable insights exactly where they work.

### What can you do with DAT integrations?

DAT's RESTful APIs make integration straightforward with solutions like RateView, Ratecast, Benchmark, Market Conditions Index, Tracking, and more.

**Get 360° market visibility** ▶ Access past, present, and forecast rates and see a full picture of market conditions.

**Procure and source with confidence** ▶ Automate rate lookups, manage booking and bid requests, and benchmark performance against the competition.

**Get control of your operations** ▶ Track shipments, post and search loads, and manage private carrier networks.

**Evaluate risk, manage compliance** ▶ Qualify and monitor carriers, contribute rate data, and improve routing guide compliance.

## APIs made easy

Need something specific? No problem. Thousands of customers have built custom workflows to fit their exact needs — from syncing data and triggering actions to automating reporting. Our team makes the process fast and simple, guiding you through every step so you can connect, automate, and scale with confidence.
