![Shipwell® logo]

No complexity, just complete supply chain clarity.

By bringing together Shipwell's user-friendly TMS and DAT's best-in-class freight data, you'll see your transportation strategy in a whole new light. The insights you need, all in one place—so you can reduce costs and plan more effectively.

Brilliant benefits

Smarter Decisions Backed by Reliable Data
Make data-driven shipping decisions with confidence using real-time spot rate data, market trends, and historical pricing insights. Plan routes and pricing strategies with unparalleled accuracy and agility.

Seamless Integration, Effortless Usability
Manage your entire transportation strategy all in one, easy-to-use interface, so you can spend less time switching tools and more time optimizing logistics.

Remove the Guesswork and Improve Efficiency
Accurately forecast with market-informed insights and enhance your operations by streamlining scheduling, bidding and carrier selection. Gain the clarity you need to make decisions that drive profitability.

+95% forecast accuracy across 7M+ daily predictions

Effortless integration

Intelligent Pricing at Your Fingertips
When integrated with Shipwell's Pricing Intelligence, DAT users instantly access spot and contract rates for dry van, reefer, and flatbed lanes.[1]
- Accurate market rates for smarter pricing decisions
- Support for 3- and 5-digit postal codes, city/state, & address-based searches

Instant Access to the DAT Load Board
Post loads in just a few clicks to DAT's marketplace to maximize your load visibility.[2]
- Include offer rates for competitive freight booking
- Future-ready for additional load board integrations

Easily Source Capacity When You Need It
Quickly find the right carrier with Shipwell's unified interface and seamless access to DAT's available truckload capacity postings.[2]
- Visibility to live truck posts across multiple equipment types
- Quick carrier connections to secure a match
