

Streamline sourcing and accelerate bid evaluations

Keelvar's AI-powered sourcing platform now integrates directly with DAT iQ RateView, giving shippers instant access to spot and contract rate benchmarks directly within their RFP workflow.

This integration removes manual work and replaces guesswork with accurate, market-reflective, unbiased insights, and smart decision-making — whether responding to short-term spot quotes or preparing long-term transportation contracts.

Transform workflows with smarter sourcing

The integration transforms the way shippers approach freight sourcing by delivering:

Real-time benchmarking

Automatically pulls current market rates for both spot and contract freight rates based on lane, mode, equipment, and time period to meet diverse shipment needs.

Dynamic procurement optimization

Provides instant enrichment of bid sheets with accurate freight data, enabling users to act quickly and efficiently in fluctuating markets.

Supplier feedback

Enables traffic-light visual scoring and outlier detection to improve bid quality.

Secure access

Ensures all data requests are authenticated through user and organization tokens, protecting sensitive information during procurement events.

When DAT's market-leading data is embedded within Keelvar's platform, users begin managing sourcing events with newfound precision and confidence.

Secure, scalable, shipper-first

This integration is more than a feature — it's a procurement game-changer. You'll gain:

Smarter procurement decisions

Arm your team with the insight to choose the most cost-effective and reliable freight options, backed by unbiased market intelligence.

Faster cycles

Reduce RFP turnaround time with instant bid validation and supplier feedback.

Measurable cost savings

Avoid overpaying or underselling by relying on real-time benchmarks to drive more informed negotiations.

Eliminate busywork

Decrease the administrative burden of freight procurement and focus on strategic decision-making instead of chasing data.

By automating the retrieval of reliable, real-time freight rates and embedding them directly into your workflow, this integration empowers shippers to stay ahead of market trends, make better sourcing decisions, and maximize efficiency.

Elevate your freight sourcing game

Gain the edge in procurement. Harness the power of Keelvar and DAT integration today. Contact us at helloshippers@DAT.com to learn more about how this solution can transform your freight sourcing processes.
