

A GREEN INDUSTRY GOES GREENER

**CULTIVATE SUSTAINABILITY
WITH CONTAINERS AND
TAGS CRAFTED FROM
100% RECYCLED PLASTIC**

NEW

Sustainability starts with recycling. That's why our newest injection-mold Grande™ container is made with 100% recycled plastic. It's our way of helping the green industry be a little greener.

WHAT HAS CHANGED:

These recycled containers will make your customers feel good about purchasing plants in pots that are eco-friendly from the start.

WHAT HAS NOT CHANGED:

- 1 100% recyclable as a #5 plastic
- 2 4 tag-slots
- 3 Self aligning in trays
- 4 Premium brand recognition on all 4 sides
- 5 Fits our existing 8-count & 10-count tray

The only difference you'll notice is the color which is slightly off-white due to the nature of the recycled products within. It has the same shape, size and functionality as the original – just from 100% recycled plastic that makes your customers confident they're purchasing an eco-friendly option.
