*Rumohra*, the leather leaf fern is native to the Southern Hemisphere, including South Africa, Australia, New Zealand, Madagascar, and parts of Central/South America in forests, rocky slopes, and moist, shaded areas.

#### **LIGHT**

Low to medium indirect light

#### **WATER**

Evenly moist, but not soggy

#### **FERTILIZER**

Once per month at half strength when it is actively growing. Avoid watering or fertilizing the foliage directly.
