[provenwinners.com/LeafjoyH2O](https://provenwinners.com/LeafjoyH2O)

The easiest plant collection available. This virtually care-free houseplant can be placed anywhere in the home.

### **LIGHT**

Indirect low to medium light, never in direct sun

### **WATER**

Lasting up to 1 year without watering, change out if discolored and only add distilled water when less than 2" remains.

### **FERTILIZER**

No need, these plants are super-charged at the grower level to last for over a year in these vessels.

### **GROWTH**

Super slow growing to maintain their neat appearance - root growth is fun to watch through the glass and it can naturally self-prune.
