The new Terraform™ Terrariums are the easiest, no-care way to bring nature to any indoor space. The variable plant communities have been hand-selected for each terrarium for successful compatibility and ease of care.

LIGHT

Place in indirect, medium-bright light. Do not place in direct sun and for indoor use only.

WATER

No need to water or fertilize for up to 1 year.

HUMIDITY

Watch for condensation on the glass. If the glass stays covered in condensation for 12 hours per day, move the terrarium to lower light or tilt the cork open for 1 hour. Otherwise, keep the cork on.

PRUNING

As plants grow, you can choose to watch nature take its course or prune with sanitized scissors to keep plants small and compact. Plants will naturally shed their oldest leaves as they grow. This is all part of the cycle of life. You can choose to remove them or let them compost in place.
