Tradescantia species are primarily found in the Americas, ranging from southern Canada to northern Argentina, including the West Indies. They are prized for their vibrant, trailing foliage and ease of care. Every so often, you might find delicate, little three-petaled pink or white flowers peeking out of the new growth at the ends of the stems.

#### **LIGHT**

Bright indirect light, but highly adaptive to very low light

#### **WATER**

Average water needs, can be on the drier side between water

#### **FERTILIZER**

Feed once per month at half strength when plant is actively growing in spring and summer. When days get shorter, reduce fertilizer and water.

#### **GROWTH**

The vining stems are fun to grow in hanging baskets, growing down shelves, or as a spiller element in a mixed dish garden.
