

Supertunia® Bordeaux™ II

New for the 2025-2026 Season

provenwinners.com

Supertunia® Bordeaux™ II

Improved Petunia

The Goal of Greater Consistency.

Over the last couple of years, we have seen some variabilities with the performance of Supertunia® Bordeaux™, including foliar distortion and blind shoots as well as funneled flowers.

While we worked diligently to minimize impacts to our grower and retailer customers, given the importance of this variety, we know some were frustrated and have been asking for an improvement.

Supertunia® Bordeaux™ II

Improved Petunia

Outstanding Garden Performance

Like many Proven Winners® annuals, Supertunia® Bordeaux™ is a variety that consumers request by name and share widely on social media.

Supertunia® Bordeaux™ Improved has been tested over multiple years, confirming strong grower production performance, retail appeal, and most importantly, outstanding garden performance for consumers.

The #1 Plant Brand.

Supertunia® Bordeaux™ II

Improved Petunia

Better Overall Performance

This new introduction has dramatically increased genetic stability, resolving the somaclonal variation issues previously seen in the original variety and allowing for greater consistency across the supply chain.

Supertunia® Bordeaux™ Improved bears slightly lighter lavender blooms than the original variety, but with the same dark throat and veining. Sometimes, the flowers of Supertunia Bordeaux Improved will be accented by a faint white picotee margin.

The similar flower color and pattern, combined with the improved overall plant performance, makes Supertunia® Bordeaux™ Improved an easy swap in existing recipes and single container production.

Improved Petunia

Weather Tolerance & Durability

Supertunia® Bordeaux™ Improved has superior weather tolerance and improved petal substance.

This ensures that flowers maintain vibrant color and presentation even after heavy rainfall, providing consistent retail appeal and reliable garden performance.
