For Easy Filling...
Lay tray/pot combinations next to each other and pour potting material over the top. Smooth out excess for quick filling.

1 Turn your open case of 4.5 Square Vacuum Containers upside down so the bottoms are facing up. Remove the box.

2 Take the accompanying tray, and with the bottom facing up, firmly push against the bottom of the stack of containers until you feel a "snap".

3 Lift tray with containers snapped in and repeat the simple process!

This 4.12" x 3.62" container features:

- 1** 1.65-pint capacity
- 2** Case configuration designed to work with the H.C. TCS10452 Press Fit Tray 21.25" x 8.62".
- 3** Speed and labor savings by allowing 10 containers to be pressed into a tray at once vs. one at a time.
