STI - THE TOTAL FIRESTOP SOLUTION

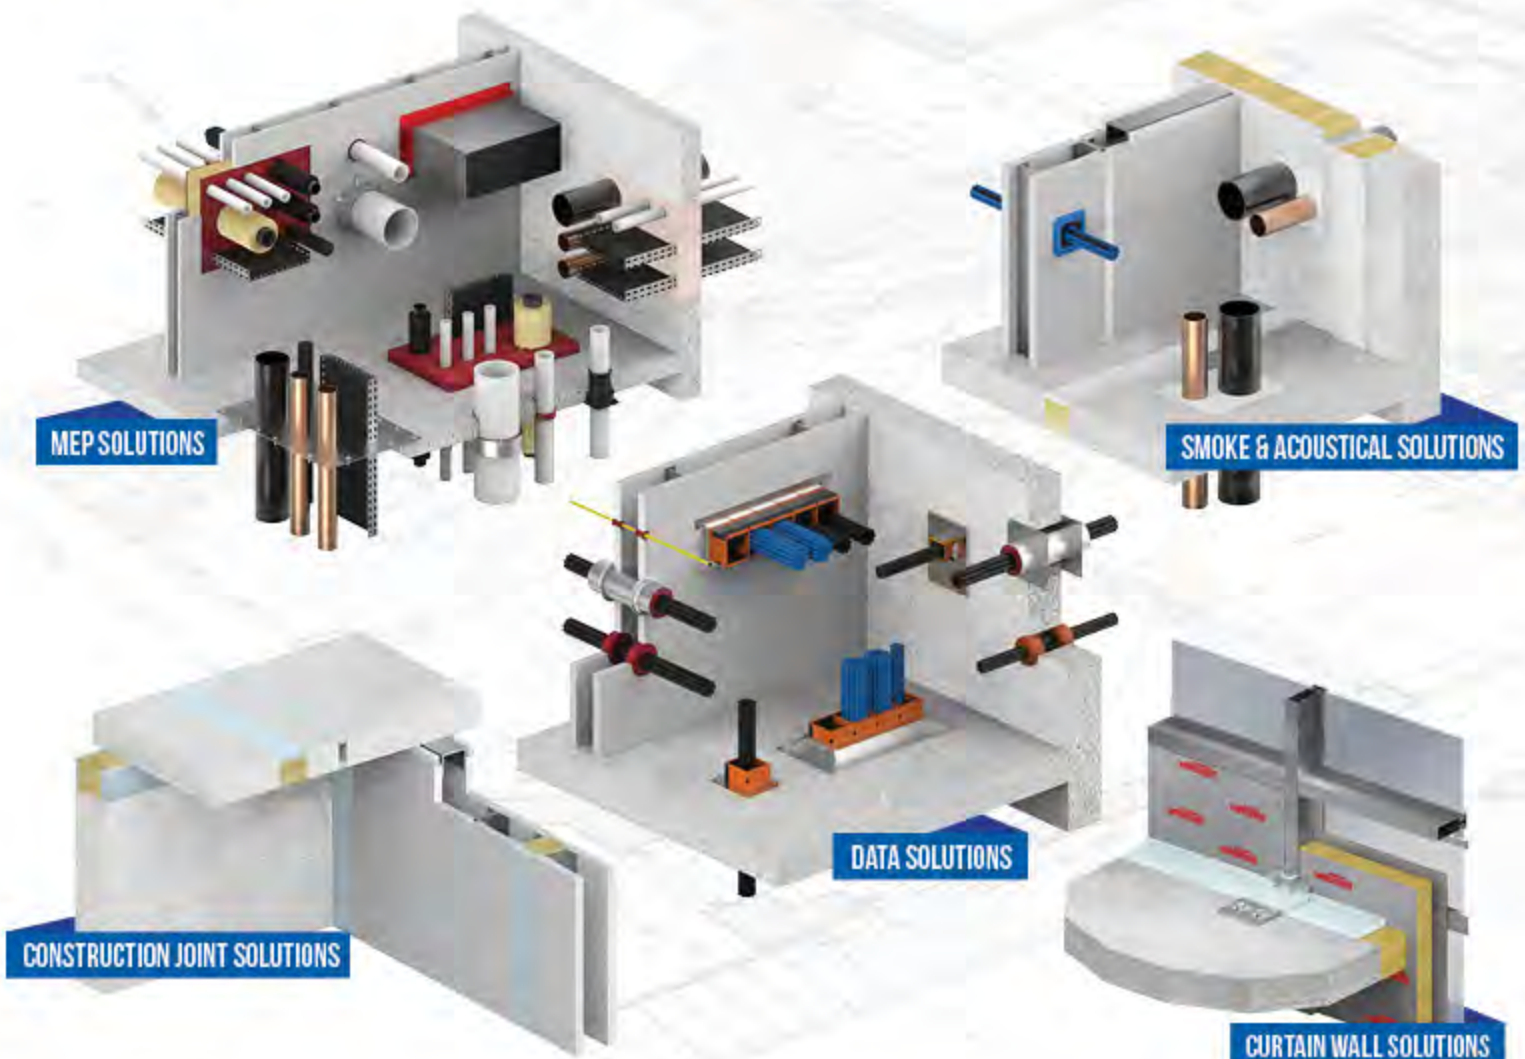

For the past 25 years, Specified Technologies Inc. has worked closely with the construction industry to create simple solutions to complex firestopping problems. STI has been at the forefront of developing the most advanced and cost effective firestop solutions on the market, offering premium quality, superior performance, and best in class service, training and support.

STI offers a comprehensive range of product categories designed to address almost any application and backs them with over 1,300 UL® Certified systems – more than any firestop company in the world.

Firestopping is STI's only business, so we invest the time to understand the unique needs of specific construction segments and applicators and then develop products, tested systems, and programs tailored to meet these needs. The results are industry-changing, innovative, patented technologies such as the EZ-Path® Fire Rated Pathways and Triple S® two-stage intumescent sealants, as well as the industry's first web-based "Submittal Builder™ program."

STI is committed to supporting our customers by providing sustainable firestop solutions, treating them like partners, and by consistently adding value beyond the sale. No matter what the scope of the project entails, you can depend on STI to deliver knowledgeable advice, premium quality products, and the total firestop solution.
