

## EZ Path® Cable Tray Retrofit Device

The EZ Path® Cable Tray Retrofit Device is designed for addressing non-compliant cable tray penetrations in fire-rated wall assemblies. Its split housing design installs around existing cable tray penetrations restoring fire resistance ratings. Instantly restore compliance with the EZ Path® Cable Tray Retrofit Device for penetrations loaded with up to 100% visual fill of cables.

### Features & Benefits

- Easy to install
- No additional firestopping required
- Tested in Concrete and Gypsum Board Walls
- Sizes available for 12 in (304.8 mm) through 24 in (609.6 mm) wide cable trays
- Tested cable fills from 25% up to 100%
- Suitable for ladder and wire basket style cable trays
- Safety Orange for easy identification
- Bring overfilled cable trays back into code compliance

### Applications

EZ Path® Cable Tray Retrofit Device initiates or restores non-compliant overfilled cable tray conditions in fire-rated walls. Cable capacity ranges from 25 to 100% visual fill. The two-piece split device facilitates installation around existing cable trays. The steel housing fastens directly to the wall surface or combines with steel adapter plates or SpecSeal Composite Sheet when addressing oversized openings.

EZ Path® Cable Tray Retrofit Devices are available to accommodate varying cable tray widths from 12 in to 24 in. No additional putty or sealant is required for installation.
