

PERIMETER FIRE CONTAINMENT PROTECTION

SpecSeal® Quick Clip™ Perimeter Fire Containment System (L-Brackets)

SpecSeal® Quick Clip™ Factory Installation System (L-Bracket) is the fastest way to install curtain wall insulation for perimeter fire containment systems. Simply fasten the L-shaped brackets to the mullion, cut and fit the curtain wall insulation and then secure the insulation in place with self-locking fasteners. The brackets allow the stiffener channel to be eliminated in most insulation applications above 2" (50.8 mm). If required, the stiffener channel may be locked into place without an additional mechanical attachment. This versatile system is great for factory-installed curtain wall panels or recladding projects where the system will be installed from the building's exterior.

Features & Benefits

- Fasteners provide a quicker insulation install compared to screws or weld pins
- Eliminates stiffener for most insulation applications above 2" (50.8 mm)
- Easy installation of stiffener channel (when required)
- Eliminates the need for impaling pins and spikes; improving installation safety
- Allows for factory installation of curtain wall spandrel panels
- L-brackets are available with or without tabs, offering design and application flexibility
- All components may be installed from the glass side making glazing easier – no more flipping units!
- Tested to ASTM E1233 for 100 MPH+ wind loads
- Meets ASTM E2307 for up to 2 hours of fire resistance
