

# Quick Clip™ L-Bracket Perimeter Fire Containment System

**SpecSeal® Quick Clip™ L-Bracket Perimeter Fire Containment System** is the fastest way to install curtain wall insulation for perimeter fire containment systems. Simply fasten the L-shaped brackets to the mullion, cut and fit the curtain wall insulation, and then secure the insulation in place with self-locking fasteners. The brackets also allow the stiffener channel to be locked into place without additional mechanical attachment. This versatile system is great for factory-insulated curtain wall panels or recladding projects where the system will be installed from the building's exterior.

## Features & Benefits

- Tested to ASTM E1233 for 100 MPH+ wind-loads
- All components can be installed from the glass side to make glazing easier— no more flipping units
- Meets ASTM E2307 for up to 2 hours of fire resistance
- Patent Numbers: 10329761, 10329762, 10626603, 10724233, 11898348
