SpecSeal® Quick Clip™ Perimeter Fire Containment System (L-Brackets)
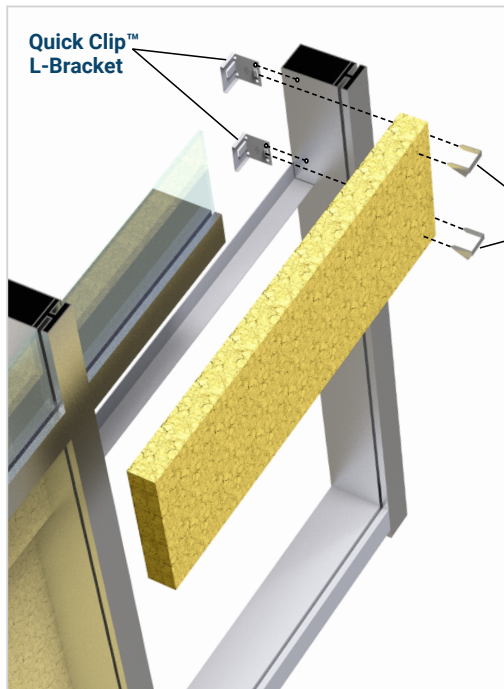

SpecSeal® Quick Clip™ L-Bracket Perimeter Fire Containment System is the fastest way to install curtain wall insulation for perimeter fire containment systems. Simply fasten the L-shaped brackets to the mullion, cut and fit the curtain wall insulation, and then secure the insulation in place with self-locking fasteners. The brackets also allow the stiffener channel to be locked into place without an additional mechanical attachment. This versatile system is great for factory-installed curtain wall panels or recladding projects where the system will be installed from the building's exterior.
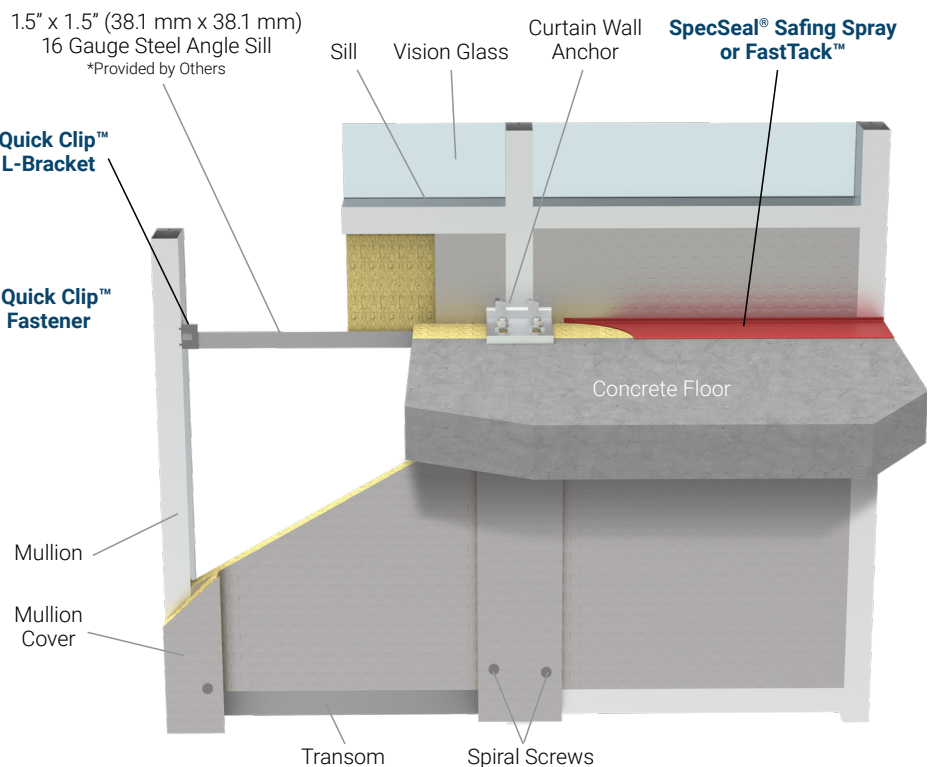

Features & Benefits

- Only out-of-the-box large diameter collar offering
- Fasteners provide a quicker insulation install compared to screws or weld pins
- Easy installation of stiffener channel
- Eliminates the need for impaling pins and spikes; improving installation safety
- Allows for factory installation of curtain wall spandrel panels
- L-brackets are available with or without tabs, offering design and application flexibility
- All components may be installed from the glass side making glazing easier – no more flipping units!
- Tested to ASTM E1233 for 100 MPH+ wind loads
- Meets ASTM E2307 for up to 2 hours of fire resistance
