

Track Top Gasket

Track Top Gasket makes short work of construction joints in gypsum board construction. It eliminates the need for firestop sealants or sprays by firestopping as the wall is constructed. Track Top Gasket is easily cut to length with scissors or a sharp knife, installing quick with no waste. And now, with newly added foam strips, TTTG better conforms to rough concrete surfaces.

Features & Benefits

- Works with any ceiling track
- Tested for both standard and shaft wall construction
- Allows for 100% compression and extension
- Available in Red for easy identification and inspection
- Tested in head-of-wall, wall-to-wall, and bottom-of-wall joints
- New foam strips conform to concrete surfaces
