

## PERIMETER FIRE CONTAINMENT PROTECTION

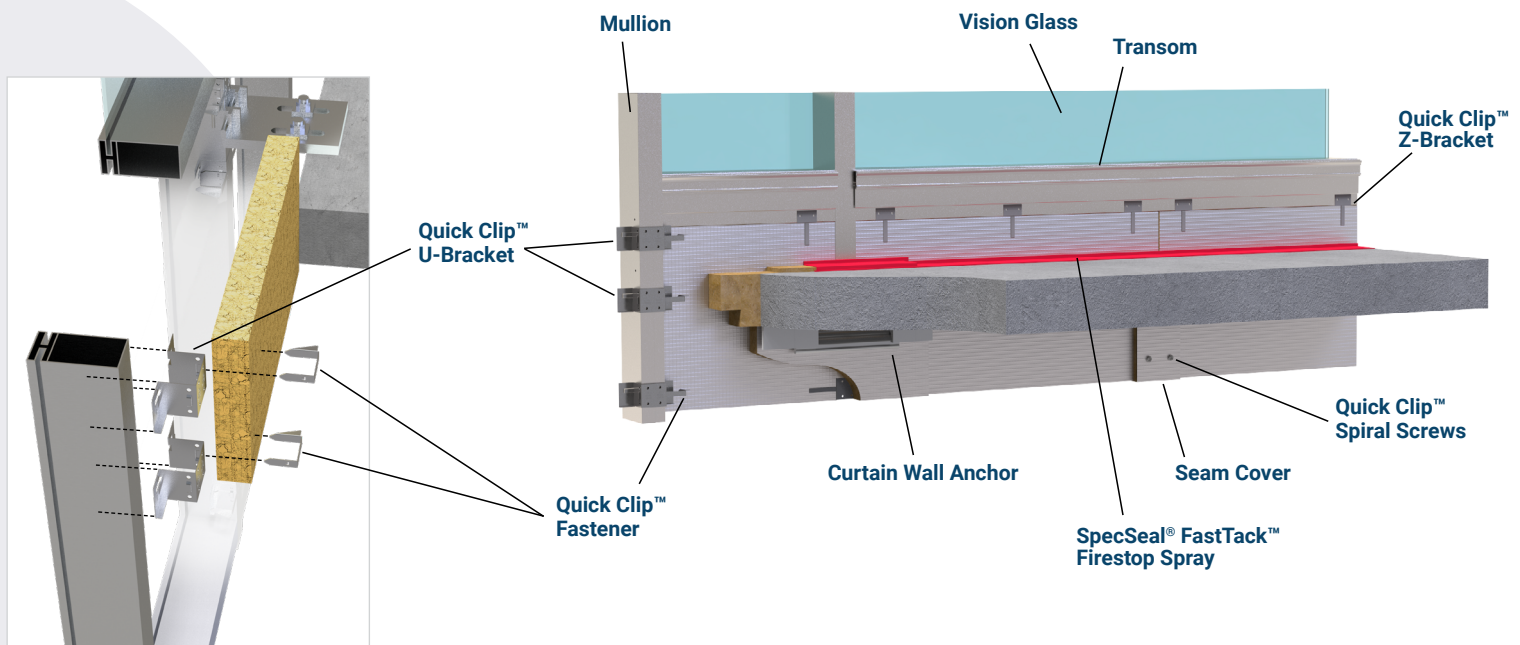

# SpecSeal® Quick Clip™ Perimeter Fire Containment System (U-Brackets & Z-Brackets)

SpecSeal® Quick Clip™ Field Installation System is designed to accelerate the installation of curtain wall insulation for perimeter fire containment systems. The system's unique U-brackets clip onto the mullions without direct attachment by screws. Additionally, the Z-bracket design accommodates corner and non-standard applications. Self-locking fasteners secure the insulation panels in place. The brackets allow the stiffener channel to be eliminated in most insulation applications above 2" (50.8 mm). If required, the stiffener channel may be locked into place without an additional mechanical attachment.

### Features & Benefits

- Quick installation; fewer tools and no fasteners\* for the U-Bracket
- Reduce or eliminate use of steel screws into framing members
- Eliminates stiffener for most insulation applications above 2" (50.8 mm)
- Easy installation of stiffener channel (when required)
- Increased safety by reducing cutting sharp metal and impaling pins or spikes
- Tested to ASTM E1233 for 100 MPH+ wind-loads
- Tested for up to 2 Hours of fire resistance when tested to ASTM E2307

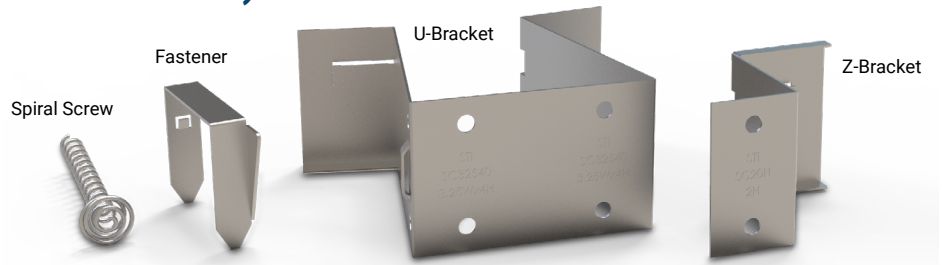

\*If mullion tolerances prevent snug fit of U-Brackets, a screw will be required to hold the bracket in place
