

EZ Path® Series 33 Extension Module

The EZ Path® Series 33 Extension modules attach to the end(s) of the Series 33 pathway and increase the effective length for thicker barriers. Each extension module increases the effective length by 6 in. (152 mm) without compromising achievable ratings. Multiple extension modules can be installed to address assemblies of virtually any thickness.

Features & Benefits

- Combines with all other plate kits and accessories for the Series 33
- Made from same heavy steel and intumescent as Series 33 Device
- Attaches to both sides of Series 33 Device
- Split design for new or existing conditions
