

EZ Path® Series 44+ Extension Module

The EZ Path® Series 44+ Extension modules attach to the end(s) of the Series 44+ pathway and increase the effective length for thicker barriers. Each extension module increases the effective length by 6 in. (152 mm) without compromising achievable ratings. Multiple extension modules may be installed to address assemblies of virtually any thickness.

Features & Benefits

- Works with all other plate kits and accessories for the Series 44+
- Made from same heavy steel and intumescent as Series 44+ Device
- Attaches to either side of Series 44+ Device when EZ Path is installed in the middle of wall or floor
- Split design for new or existing conditions
