

EZ Path® Series 33 Conduit Attachment Plate

The EZ Path® Series 33 Conduit Attachment Plate converts existing 4 in. Trade Size Conduit Sleeves and Stubs to EZ Path®. The Conduit Attachment kit consists of two split steel retaining plates that allow for the insertion and attachment of a Series 33 device into existing conduit sleeves and stubs. The plates two-part design allows for installation in new or existing penetrations that already incorporate cables.

Features & Benefits

- Tested in Concrete Floors, Concrete Walls, and Gypsum Walls
- Sized to fit 4 in. Trade Size Conduit Sleeves and Stubs
- Split design for new or existing penetrations
- Converts traditional firestop methods to EZ Path®
