

Wholesale Casualty

Overview

Welcome to your hub of all things Casualty Lines insurance, which targets insurance coverages for the various liabilities associated with business operations. Accidents can and will happen when dealing with projects of high scale and high risk. From heavy construction projects to real estate development or even life science company protection, we have crafted innovative coverage plans at Synergy that shield your business against the inherent risks of large-scale projects.

Classes

- Heavy Construction: Protects company's from accidents, damages to equipment, and potential delays or disruptions caused by unforeseen events.
- General/Trade Contractors: Coverage for certain liabilities that can affect a construction project. This can include accidents on the job site, damages that ensue in a dangerous construction project, and legal liabilities from contractual obligations.
- **Product Manufacturing/Distributors:** Protects company's against claims related to product defects, supply chain disruptions, workplace accidents, and other operational hazards.
- Life Science Companies: Tailored to address the unique risks in the biotechnology, pharmaceuticals, and medical device sectors. Covers clinical trial liabilities, product liability, and risks associated with research and development activities.
- **Real Estate:** Covers liabilities related to property management, tenant interactions, and real estate development activities. Protects against claims arising from property damages, accidents on premises, and other real estate-related liabilities.
- **Hospitality:** Covers liabilities arising from guest interactions, food and beverage services, and general operations of hotels, restaurants, and entertainment venues. Essential for managing risks related to customer safety, property damages, and service delivery.
- Healthcare: Covers a wide range of liabilities, from medical malpractice to patient safety issues. This insurance is vital for hospitals, clinics, and other healthcare providers, offering protection against claims arising from medical services and operations.
