

Benchmark Gensuite Incident Management

Manage Incidents from Initial Report to Closure

As part of Benchmark Gensuite’s Incident Management software suite, the Incident Management application enables users to identify, analyze and correct incidents and events to restore workplace operations and protect against future occurrences. Incident Management enables cross-functional teams to easily record incident data, notify your team on incident updates in real-time, conduct incident investigations, evaluate trends and comply with incident-related requirements across Environmental, Health & Safety, Sustainability, Quality, and Security functions.

Incident Management works seamlessly with cross-functional Benchmark Gensuite solutions to establish an effective incident management process that enables teams to effectively manage cases from initial reports to closure.

Discover What Incident Management Can Do For You

Establish Your Incident Management Process

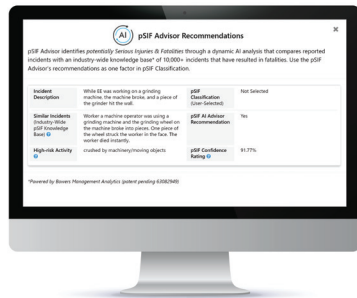

Standardize the Incident Reporting & Investigation Process	Comprehensive Program Management	Leverage the Power of Technology for Valuable Program Insights
<ul style="list-style-type: none"> ▶ Record & investigate a variety of incidents, including injury/illness cases, fires, vehicle accidents, etc. ▶ Conduct incident investigation and root cause analysis (RCA) using robust data mining tools ▶ Notify key process owners (Supervisors, Site Leads, etc.) of incident updates in real-time ▶ Track injury/illness rates based on regional standards; tie-in with HR systems for employee hours worked 	<ul style="list-style-type: none"> ▶ Integrate with occupational health, medical & Workers' Compensation systems for case tracking and program visibility ▶ Incorporation of Human & Operational Performance (H&OP) principles & tools to reduce incidents caused by human error ▶ Integrated tracking & reporting of EHSQ incidents/events ▶ Produce site metric & regulatory reporting with batch upload features 	<ul style="list-style-type: none"> ▶ AI-based classification & identification of potential serious injuries & fatalities with pSIF AI Advisor™ ▶ Analyze trends, rates & KPIs using scalable data reporting, charting and metric calculations ▶ Transition seamlessly from desktop to mobile with integrated capabilities—including offline access & mobile enabled with pSIF AI Advisor™ forms

Report, Follow-up and Investigate Safety, Environment, Quality and Security Incidents with Benchmark Gensuite Incident Management

Identify real-time trends that could lead to serious injuries & fatalities (SIFs) & inform worker protection strategies with the integrated pSIF AI Advisor™

Powerful Workflow Connections

Connect Benchmark Gensuite Incident Management with Benchmark Gensuite Concern Reporting, Initial Injury Reports and ActionTracking System to manage the entire incident management process from start to finish.

Integrated Reporting

Gain enterprise-wide insights across environmental, health, safety, quality, sustainability, & security functions with built-in reports to identify leading and lagging safety indicators, track and manage incident data collection and send system-generated incident notifications for site-wide accountability and visibility.

GPS Incident & Event Tracking

Pinpoint GPS coordinates of incidents and events that occur in field operations through intelligent mapping capabilities.

What are people saying about Benchmark Gensuite Incident Management?

“Event reporting in particular, and the ability to flag high and potentially high severity incidents, has resulted in incident visibility and detailed reporting parity, which we didn’t have with our previous system, and a confident reassurance that lessons learned and actions to mitigate future recurrences are being documented and built upon.”
