

Benchmark Gensuite® Risk Registry

Holistic and Configurable Framework To Assess & Control Enterprise Risks

Discover What Risk Registry Can Do For You

Identify, Manage, and Mitigate Risks Across Sites, Functions & Activities

- ▶ Quickly identify and assess risks and hazards across the entire organization or by individual site
- ▶ Evaluate risk mitigation opportunities and calculate ROI of control measures
- ▶ Reduce cost by consolidating EHS and enterprise risk within a centralized platform
- ▶ Increase regulatory compliance and protect your organization from fines
- ▶ Establish and streamline proper controls for hazard identification (quality, equipment, personnel, etc.) and follow-up actions
- ▶ Robust reporting to visualize initial and mitigated risk scores against performance across functions, such as EHS, Security, Facility, IT, Quality, etc.
- ▶ Leverage multiple risk assessment methods to meet the needs of different operational processes or organizational functions
- ▶ Address ISO 14001 requirements to effectively determine risks and opportunities related to environmental aspects and impacts

Effective risk management requires identification of hazards, an assessment of the severity and probability of their potential consequences, and the definition of control measures to mitigate associated risks. Using a digital system to support your risk management program will increase efficiencies in assessing and mitigating risk to protect your organization from loss, fines, and adverse impacts.

Benchmark Gensuite Risk Registry is a comprehensive and highly configurable enterprise risk management solution. With maximum support for risk management and operations teams, organizations can establish a repository and action plan for all risks identified in the workplace. Configurable frameworks and scoring models allow users to quickly assess enterprise risks and implement effective controls, at an individual site or across an entire enterprise, to reduce hazards and risks to the organization and employees

Risk Registry By The Numbers

2,500+ activities/hazards scored for baseline & post control risk

KEY CAPABILITIES

- ▶ Establish & define a repository of risks identified at the site, organization or business level
- ▶ Evaluate and rank risks based on severity/likelihood of single or multiple events with integrated customizable scoring model
- ▶ Visualize risk probability & consequence on a dynamic and interactive heat map
- ▶ Define mitigation controls and establish action plans – intelligently integrated with other Gensuite tools to drive accountability
- ▶ Upload & associate external risk analysis tools for reference (i.e. bow tie, strength of defenses, FMEA, fishbone, etc.)
- ▶ Assign risk ownership & establish control plans and review timelines
- ▶ Create and assign control plans via integrations with other Benchmark Gensuite applications, such as Compliance Calendar, Action Tracking System, Incidents & Measurements

Extensive Integrations with Benchmark Gensuite Tools

Establish a repository and action plan for all risks identified in the workplace

- ▶ Incidents & Measurements
- ▶ Action Tracking System
- ▶ Compliance Calendar
