

# Benchmark Gensuite<sup>®</sup> Industrial Hygiene Application

Identify Hazards & Mitigate Risks

## Discover What Industrial Hygiene Application Can Do For You

Manage a healthier & safer workplace

- ▶ Establish a standardized process for IH exposure assessments across all site operations
- ▶ Document qualitative IH demographic surveys and exposure / control info; prioritize for follow-up and monitoring
- ▶ Easily log monitoring data using customizable online monitoring template or Excel batch upload options
- ▶ Leverage integrated solutions for enhanced IH programs such as risk assessments, statistical IH analysis and regulatory notifications (COSHH)
- ▶ Auto-generate email notifications of IH assessments, Occupational/Permissible Exposure Limits (OEL/PEL) exceedances and monthly site and business monitoring plans
- ▶ Access multilingual interfaces for turnkey global enterprise deployment

An integrated Industrial Hygiene (IH) management solution allows you to minimize hazardous exposures (chemical, noise, radiation, etc.) through risk assessments, engineering controls, personal protective equipment (PPE), hazard communication and labeling, and training.

With the Benchmark Gensuite Industrial Hygiene application, Certified Industrial Hygienists (C.I.H.) or site EHS teams can more productively manage IH assessments and monitor data, reduce and prevent overall IH risks, and successfully promote a safer and healthier workplace.

## Manage All Your Industrial Hygiene Processes More Efficiently with Benchmark Gensuite®

Integrate Industrial Hygiene into a full suite of applications that allow you to minimize chemical hazard exposure through risk assessments and personal protective equipment (PPE), hazard communication and labeling, and proper training.

### Develop Risk Assessments

#### Safety Risk Assessment

Develop and maintain a repository of job-based risk assessments, available for easy search and access by all employees.

### Enhance Hazard Communication

#### SDS System

Instant access to a centralized repository of ~500,000 up-to-date SDSs and 275,000+ Globally Harmonized (GHS) SDSs, making it easy to track your approved chemical product inventory.

### Manage and Deliver Training

#### Training tracker & My LMS

Establish scheduling and set up online registration for classroom-based training offerings with session attendance and management capabilities.

## What are people saying about Industrial Hygiene application?

“Establish your site launch priorities and communicate launch readiness to your business lead. The Benchmark team makes deployment and on-going application success easier than ever with regularly held training sessions. Simply check the “Need Training?” link on the Benchmark Gensuite home page to view upcoming IH training sessions.
