

A Partnership to Connect Best-in-Class Digital Employee Care / EMR and H&S Management

Seamlessly Connecting Digital Occupational Health & Safety and Medical Systems

Benchmark Gensuite® has partnered with **Enterprise Health** to create a robust solution for Total Worker Occupational Health & Safety Management. This partnership of best-in-class SaaS solution platforms offers a seamlessly connected suite of digital tools that enables tracking of health & safety programs and employee medical care & monitoring.

Benchmark Gensuite® is a powerful best practice-based, configurable digital health and safety program management system from Benchmark Digital, with a breadth of integrated digital tools from Industrial Hygiene to Incident Management & Occupational Health process and core medical visit tracking. Our turnkey deployments consolidate safety, environmental and occupational health needs into a single digital system that is quickly configured and launched, typically within 3 months.

Enterprise Health captures Occupational Health & Medical industry standards for On-Site Employee Health Clinic Management. The powerful Enterprise Health platform features robust medical clinic workflow and data management, including:

- ▶ Employee Health Records
- ▶ Immunization Management
- ▶ Medical Surveillance
- ▶ Primary Care
- ▶ Medical Device Compatibility
- ▶ Diagnostic Testing

Benchmark Digital

Risk+Compliance

Sustainability

Stewardship

ESG Reporting

Enterprise Health is one of the largest providers of occupational health software in the world, with customers in over 55 countries and nearly a dozen languages, serving several million employees globally. Enterprise Health is the only comprehensive employee health record that delivers occupational health and compliance, clinical care and employee engagement on a single, certified, interoperable cloud-based EHR platform – equipping enterprise clients with a powerful toolset to improve health, wellness, productivity and efficiency throughout their organization.

Enterprise Health is everything you need to manage employee health – all rolled up into one complete occupational health software solution.

Key EH Competencies

- **Occupational Health and Compliance:** automates and streamlines a wide variety of occupational health programs and simplifies compliance tracking, management, and reporting.
- **Primary Care:** Built on a certified electronic health record platform, Enterprise Health gives you the functionality to expand your onsite clinic operations to include primary care, urgent care, chronic disease management and health and wellness services.
- **Employee engagement:** Portals and mobile apps make it easy for your employees to interact with clinical staff and provide electronic access to information they can use to improve personal and family health and wellness.
