

Benchmark Gensuite[®] Inspection Tool

Conduct, Assign & Track Inspections

Discover What Inspection Tool Can Do For You

The only tool you need for Workplace Inspections

- ▶ Create inspection checklists customized to each site's program or process
- ▶ Assign inspection frequency & responsibility across a site, including automatic email reminders
- ▶ Track in-progress, missed and completed inspections in one centralized location with real-time dashboard capabilities, scoring and charts
- ▶ Identify findings & corrective actions and export to the Benchmark Gensuite Action Tracking System for assignment & closure
- ▶ Conduct inspections online or offline via the Benchmark Gensuite Mobile app
- ▶ Leverage Mobile to scan barcodes and QR codes for quick access to routine equipment/area specific inspections
- ▶ Trend inspection results and identify common issues

More and more companies are discovering the value in switching to software applications for daily Environmental, Health & Safety and Sustainability (EHS&S) activities, with site inspections being no exception. It's time to replace paper-based inspections with Benchmark Gensuite Inspection Tool.

Benchmark Gensuite Inspection Tool offers a central platform for users to conduct, assign and track EHS inspections, including mobile & offline capabilities to conduct inspections in the field. Digitize inspections, consolidate data across sites & save time with Inspection Tool!

Join over 110 companies that use Inspection Tool!

Use Inspection Tool throughout the entire inspections process—from customizing inspections checklists to trending site findings and assigning corrective action, all on an easy-to-use interface.

Inspection Tool Case Study

Business Profile

- ▶ Publicly held, global industrial company
- ▶ 250+ locations
- ▶ Over 50,000 employees

Business Needs

- ▶ Central system to create a library of inspections checklists for global sites

Benchmark Gensuite Results

- ▶ Inspection Tool initiated more than 50,000 inspections in the first year; 8,500 findings logged
- ▶ Benchmark Gensuite used for field service inspections
- ▶ Cloud-based software enables real-time data to be reported to supervisors

What are people saying about Inspection tool

“*Benchmark Gensuite allows us to put more structure to our inspections process. It allows our standard work teams to develop checklists, and team leaders to provide additional requirements as needed. The biggest benefit of using Benchmark Gensuite is that it operationalizes inspections by putting the right tools in the hands of our employees.*”

—Sarah Marshman, EHS Program Manager at Ingersoll Rand
