

# Benchmark Gensuite<sup>®</sup> Reg Auditor

Avoid Risks & Achieve Global Compliance

## Discover What Reg Auditor Can Do For You

Conduct compliance audits using specific regulatory checklists

- ▶ Assess site compliance against standardized regulatory checklists
- ▶ Identify findings & assign corrective actions for closure
- ▶ Conduct company-wide trend analysis of audit results to address systematic issues
- ▶ Enable applicability screenings for EHS regulations for a specific checklist or group of checklists
- ▶ Analyze saved audit checklists to identify and resolve key issues
- ▶ Conduct business audits or site self-assessments based on standardized checklists local / country-specific regulations
- ▶ Tailor audit content based on site location, operations, etc. via applicability screening questions and site profiles

Auditing is critical for companies to assess risks, ensure current procedures are effective & efficient, and achieve organizational goals & objectives – otherwise your company could face costly fines and penalties. But how can you ensure that you always have up-to-date regulatory content tailored to your industry & jurisdiction?

With Benchmark Gensuite Reg Auditor, you'll centralize the auditing process with a single digital tool from conducting business or self-assessments based on standardized checklists, to managing audit assignment & scheduling, and easily tailoring audit checklists by location or company specific requirements.
