SUSTAINABILITY

Six Senses Ninh Van Bay is committed to sustainability, its obligation to the environment, and the community. The resort has programs in place to conserve energy and manages its own reverse osmosis plant and crystal water refinery, producing high quality drinking water without the use of plastic bottles. All revenue made from selling water at the resort is used to fund the provision of filtered drinking water systems in several local communities.

In 2022, Six Senses Ninh Van Bay introduced Ninh Van Greens, the first in-resort solar farm in Vietnam with an organic garden planted beneath 800 solar panels, which helps to provide electricity, organic produce, and hot water for the resort. Guests are invited to share the responsibility by offsetting their carbon footprint, or by joining the resort on their three major sustainability projects: black-shanked douc langur conservation, coral restoration, and biodiversity preservation.

RESORT ACTIVITIES

Hike to Bai Nho
This hiking trail leads to the top of Heo Mountain from where you overlook Ninh Van Bay. Coming over the hill we will reach the reservoir where you may spot the critically endangered douc langur. Descend to a private beach with picnic and return by kayak or speed boat.
