Pay Now

Use this script to communicate REV Share 2.0's game changing Pay Now feature, which empowers you to instantly withdraw from your revenue share earnings.

“What’s better than maximizing your earnings with multiple income streams? Getting paid instantly! Let's talk about the exciting new Pay Now feature that's revolutionizing eXp agents’ rev share.”

“Pay Now is gamechanger that lets you withdraw from your anticipated next revenue share check for a \$1 intro transaction fee. Yes, you heard right – instant payment, at your fingertips!”

“Here's how it works: Head to the Revenue Share section of the My eXp app, find the ‘Expected Next Check’ tile, and select the Pay Now option. It's that simple!”

“The best part? You can use Pay Now as much as you'd like, as long as there's enough value in your expected next check to cover the fee. The payout you get is based on the amount displayed within your ‘Expected Next Check’ tile, minus that \$1 intro fee.”

“With Pay Now, you get the exact amount shown in your expected next check, with any adjustments handled during the standard monthly payment process. And if for any reason Pay Now isn't your preferred option, nothing changes! You'll still get your revenue share payment the way you always have.”

“Finally, if you notice the ‘withdraw from the expected next check’ button disappear from your dashboard during the monthly payment week, all is well! It'll be back soon for your next Pay Now transaction.”

“Pay Now puts your hard-earned money right where it belongs – in your pocket, right when you need it.”
