# UNITE US

Child Welfare:

Technology to Strengthen Prevention & Family Resilience

Why Unite Us

We believe there's no greater priority than the safety and well-being of all of our children. Our network-model technology addresses critical social needs impacting child safety and well-being. We power community **prevention** and **family resilience** by facilitating referrals and payments across sectors. Our **shared infrastructure** provides child welfare systems with the tools they need to accelerate the goals of the Families First Prevention Services Act and implement their Comprehensive Child Welfare Information System Modernization.

Child Welfare's
Families First Prevention Approach

Early
Intervention

Engagement

**Shared Infrastructure
and Measurement**

Community-Level
Investment

Cross-Sector Care
Coordination

Unite Us is the only cross-sector collaboration software that provides:

1 **Community-level insights** to inform your program design

2 **Invoice tools** that streamline provider invoicing and enable states to capture available federal funding for prevention

3 **Screening and referral infrastructure** at different entry points, effectively enabling the child welfare system to meet children and families where they are

A Statewide Network for Children and Families

With Unite Us, you get access to a statewide network of accountable and securely connected community-based child welfare providers, behavioral health providers, healthcare providers, social care organizations, schools, and family-serving government partners. Our integration with CCWIS technology allows for a cohesive practice model and data-delivery solutions that inform enhanced, cross-department and cross-agency analytics focused on prevention.

State/County Department

End-to-end visibility across referrals, service delivery, and invoicing enables effective management

Statewide web-based platform, providing tools that are accessible from anywhere

Streamlined reimbursement driven by detailed, timely documentation by contracted service providers

Contracted Providers

Streamlined workflow to manage screening and referrals, including non-child welfare partners like healthcare providers

Simplified invoicing that automates the billing process to reduce errors and expedite payments

Ongoing support and training to ensure system adoption and adapt to changes over time

Community-Based Organizations

Scaled service array through improved collaboration with contracted service providers

Broader service provider access through the Unite Us network, including non-contracted providers

Closed-loop visibility ensuring client needs are met quickly

Participation in an efficient, accountable network to reduce staff time managing referrals and follow-up calls

Supporting Children and Families Every Step of the Way

Our model puts the person first, ensuring at-risk children and families get the right services and support they need every step of the way. Through our closed-loop referral system, child welfare providers can closely monitor individual outcomes to ensure no child falls through the cracks.

An Adolescent's Journey

Veronica	Identification	Assessment	Referral	Outcomes
16 years old; Veronica has exhibited signs of anxiety following her parent's separation and is experiencing food insecurity	Veronica lets a case worker know that she needs assistance	Case worker conducts the state's universal screening and identifies Veronica's needs for food and mental health support	Interactive map and program filtering; Referrals sent for service of Veronica's needs; Closed loop provides referral status and case outcomes	Review data on case outcomes across the safety net to inform service demand and capacity constraints
