

Our Solution

www.UniteUs.com

Our end-to-end solution transforms communities' health from the ground up.

1 Start the **Unite Us** journey **here** and explore how we are tackling social care improvements, one individual and one community at a time.

What if you knew the areas of need in your community?

Before diving into solutions, we need to understand what is happening at the community level.

Unite Us uses socioeconomic analysis to **identify hotspots** of high community need in your state or region because geography and demographics matter.

2 What happens when we zoom in on the individual and their needs?

We believe in targeted interventions to support each person in need.

Using our Social Needs System (SNS) framework, Unite Us evaluates individuals across 12 factors, coming up with a composite SNS Score (0-100) that **predicts the level of overall social need.**

3

How can we get each person the social services they need?

At Unite Us, we are committed to supporting individuals through their total health journey.

Via our robust Unite Us Platform and Network Hub Support specialists, care coordination teams **efficiently enroll individuals** for targeted social care services.

Clients are **served with end-to-end care** through our extensive and accountable coordinated networks of health and community services.

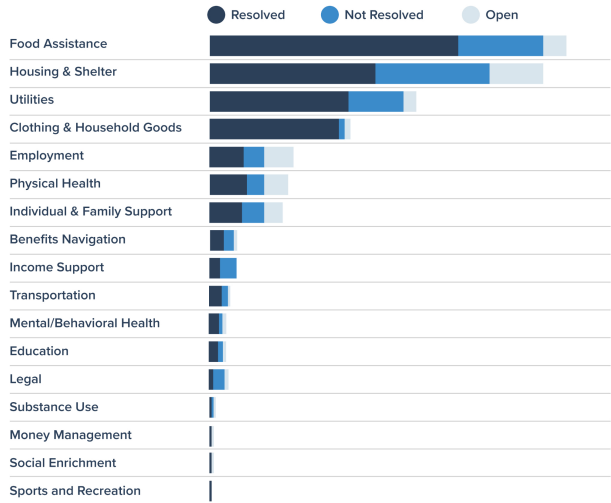

4 Deliver successful client outcomes.

Unite Us addresses each client's social need by facilitating easy access to the services available in their community.

Only by **ensuring effective social care solutions** at the individual level can we in turn create healthier communities.

Case Resolution by Service Type

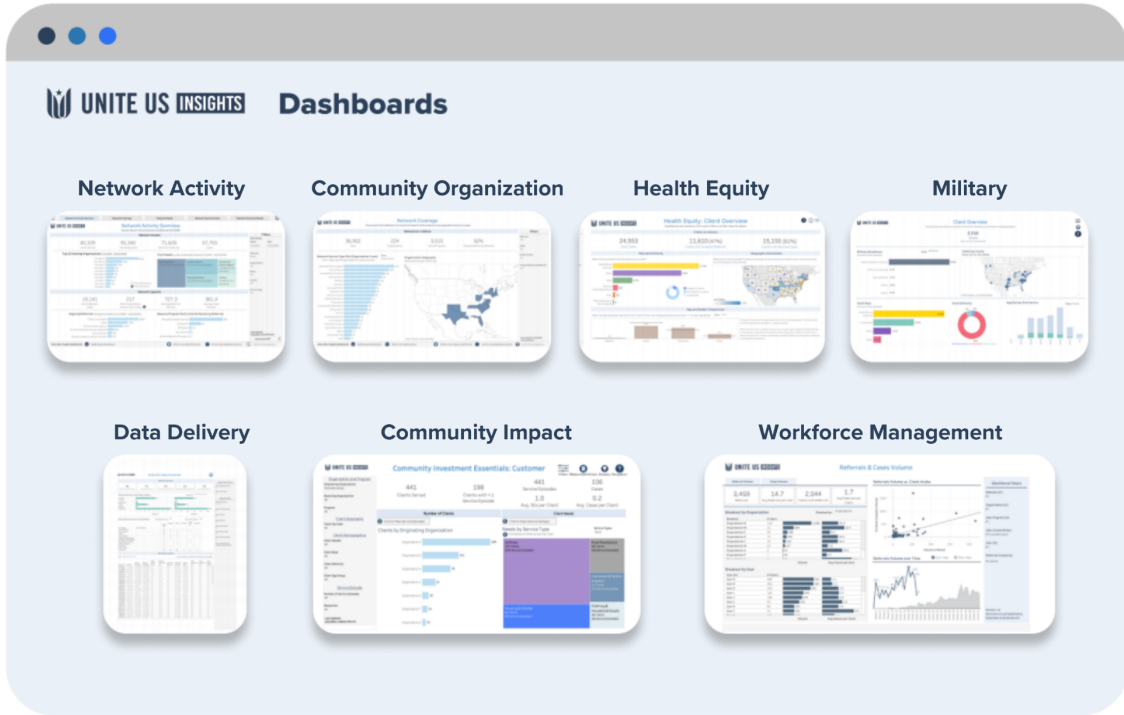

Now that we have seen the Unite Us social care journey through the individual's lens, **let's take a step back to evaluate our network-level activity, impact, and investments.**

5 Track social care delivery data through unparalleled, real-time analytics.

Throughout the lifetime of a network, Unite Us benchmarks your successes so we can measurably – and sustainably – improve individual health outcomes.

By putting your findings into action, you can empower network efficiency, drive efficacy, and ultimately set new standards of care.

Curated dashboards help your organization understand key insights

- ✔ Network Activity
- ✔ Service Demand and Delivery
- ✔ Co-occurring / Re-occurring Needs
- ✔ Network Efficiency and Impact
- ✔ Detailed Outcomes

6 Make sure you're paying for the interventions that drive positive outcomes.

Targeted social care funding is key to ensuring people get services when they need them.

Through Unite Us' capabilities, you can directly **link your investments to services provided** as well as **identify future areas, organizations, and populations to invest in.**

The screenshot shows a web browser window with the UNITE US logo in the top left. The main content is a form titled "CARES Act Distribution". The form has several input fields: "AMOUNT DISTRIBUTED (\$)" with a red asterisk, "UNIT" (set to "Dollars"), "PAYMENT METHOD" with a dropdown arrow and a red asterisk, "REASON FOR DISTRIBUTION" with a dropdown arrow and a red asterisk, "PAYMENT DISTRIBUTION ID", and "DATE OF DISTRIBUTION" with a red asterisk and a calendar icon. Below these fields is a "NOTE" section with an information icon and a text box containing the instruction: "Only include personally identifiable information (PII), protected health information (PHI), or other sensitive information if it is necessary to provide services to the client." The text box is currently empty and contains the placeholder text "Enter your note here...".

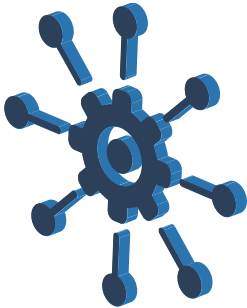

7 Built on three fundamental pillars, the end-to-end Unite Us solution enables impactful social care coordination by:

Protecting data

Client privacy is our priority. Unite Us protects client data while allowing for impactful care coordination.

Integrating systems

Unite Us builds one seamless experience across the community.

Evaluating impact

Unite Us identifies and proves the real-world impact and return on investment for social care.
