

## COYOTE® STP-XL STP PRO SERIES CLOSURE

Utilizing a similar design to PLP's original COYOTE STP Closure, the **STP-XL** is a compact drop distribution closure that provides maximum adaptability to various splicing and connectivity applications. The STP-XL's dual chamber design easily accommodates unique splicing needs with interchangeable organizers to support diverse connectivity requirements, multiple cover options, and a universal cable restraint system. The robust latch system, conical grommet design, and integrated over-molded cover enable quick re-entry and provide a secure seal over a wide range of cable profiles.

### FEATURES AND BENEFITS

- Dual chamber design of the STP-XL provides independent access to both the splice/slack storage chamber and the drop connection chamber
- Integrated over-molded cover options are quickly interchangeable between the splice/slack storage chamber and the drop chamber to easily increase splice capacity
- Robust latch system and unique grommet design enable quick re-entry and re-use
- Universal cable restraint system works across the entire STP Pro platform
- Drop chamber design supports up to 24 drops (4.9 - 5.2 mm) or 8 flat or 8 ROC™ Drops.
- Conical grommet options support a wide range of cable diameters
- Constructed from a high-strength, UV-stabilized, flame-retardant material
- Designed and tested in accordance to Telcordia® GR-771-CORE Buried, Underground, IP-68 Rated Requirements
