

Solar Applications Addendum

The provisions of this Addendum shall govern for sales of Preformed Line Products Company's (PLP) sale of solar products.

Certain of PLP's solar products are used to attach solar or photovoltaic panels or modules, or other solar apparatus, to roofs ("Solar Applications"). Solar Applications involve wind dynamics and other load and structural variables, and the risk of inadequate design. Buyer shall ensure that all such matters are thoroughly and completely reviewed by a competent individual prior to any installation, and that such qualified person is knowledgeable regarding roofing systems and structures, wind effects and calculations. PLP's website includes Design Guidelines and Configuration tools for the qualified person to consider in creating the appropriate design, which is only a portion of an adequate design and is insufficient by itself to complete the design work. Buyer agrees to refer all purchasers or end-users of Products for use in Solar Applications to PLP's website for this information.

BUYER ACKNOWLEDGES AND AGREES THAT (1) ALL DETERMINATIONS REGARDING THE STRUCTURAL ADEQUACY OR LOAD CARRYING CAPACITY OF ANY ROOF OR SUPPORTING STRUCTURE TO WHICH SOLAR APPLICATIONS ARE ATTACHED IS THE SOLE RESPONSIBILITY OF THE BUYER AND IS DETERMINED IN ITS SOLE DISCRETION; (2) ATTACHMENT OF SOLAR PANELS, MODULES OR OTHER APPARATUS TO ROOFS INVOLVES A COMPLEX, INTERDEPENDENT SYSTEM OF LINKS ANY ONE OR MORE OF WHICH MAY FAIL IF MAXIMUM LOAD STRENGTH IS EXCEEDED AT ANY POINT IN THE SYSTEM; (3) DESIGN OF SOLAR APPLICATIONS THAT FAIL TO USE THE TEST DATA AND OTHER INFORMATION AVAILABLE, INCLUDING THE INFORMATION AT PLP'S WEBSITE, AND THE SERVICES OF A QUALIFIED PERSON, MAY BE INADEQUATE; AND (4) ANY AND ALL CLAIMS THAT MIGHT OR COULD BE BROUGHT AGAINST THE PLP IN RESPECT TO ANY ACT, ERROR OR OMISSION REGARDING THE FOREGOING MATTERS ARE HEREBY WAIVED AND RELEASED BY BUYER.

Buyer agrees to take such actions as are necessary to assure that any and all persons or entities to whom Buyer sells Products for use in Solar Applications are legally bound by the foregoing disclaimer, waiver and release.
