

COYOTE® STP-L

STP PRO SERIES CLOSURE

Utilizing a similar design to PLP's original COYOTE STP Closure, the **STP-L** is a compact drop distribution closure that is designed to provide maximum adaptability to various splicing and connectivity applications. The STP-L easily accommodates unique splicing needs with interchangeable organizers supporting diverse connectivity requirements, multiple cover options, and a universal cable restraint system. The robust latch system, conical grommet design, and integrated over-molded cover enable quick re-entry that is designed to provide a secure seal over a wide range of cable profiles.

FEATURES AND BENEFITS

- Single chamber design of the STP-L provides a compact solution for splice applications
- Integrated over-molded cover options are quickly assembled and removed from the closure
- Robust latch system and unique grommet design enable quick re-entry and re-use
- Universal cable restraint system works across the entire STP Pro platform
- Various base designs allow for a multitude of combinations of feed and drop cables in a compact design
- Conical grommet options support a wide range of cable diameters
- Constructed from a high-strength, UV-stabilized, flame-retardant material
- Designed and tested in accordance to Telcordia® GR-771-CORE Buried, Underground, IP-68 Rated Requirements

Adapter Bulkhead

The adapter bulkhead can be installed on the drop organizer in the STP-L closures. This allows for flexibility in your network design while also providing a plug and play solution. Up to 24 SC or 48 LC connections can be installed using the cross-connect adapter bulkhead kits. The 24-Port Adapter Bulkhead requires the use of the Deep Cover. *Contact PLP for more information.*
