

## RAPTOR CLAMP™ DIVERTER

The **RAPTOR CLAMP Diverter** is an alternative to the BIRD-FLIGHT™ Diverter and the SWAN-FLIGHT™ Diverter for making overhead power lines visible to birds of all sizes. It provides a cost-beneficial means of reducing hazards to both power lines and birds. PLP also offers the **RAPTOR CLAMP™ LED Diverter**, which includes an exclusive flashing LED module that provides a visible indication of overhead lines in dark and low-light conditions.

### FEATURES AND BENEFITS

- Simple and easy-to-operate trigger mechanism
- Easy “bump and snap” installation on the cable
- No special tools required
- Manufactured from UV-stabilized polycarbonate and polyethylene materials
- Corrosion-resistant stainless steel hardware
- Operational temperatures up to 125°C continuous
- Applications to 69 kV three phase
- Installable via drone when paired with PLP’s RAPTOR CLAMP Drone Kit for DJI M300/M350 models

**NOTE:** Ice and wind load information is available upon request.

## SPACING

### Horizontal Line Layout

For optimal results, spacing distances are generally recommended at 15-foot intervals, depending upon local conditions. Since wind resistance is very limited, a sufficient number of RAPTOR CLAMP Diverters can be used to ensure adequate visibility without creating stresses on the line. When marking adjacent spans, overall visibility is improved by staggering placement between the spans.

## DRONE INSTALLATION KIT

The industry’s leading clamp-style diverter is now the first to offer a do-it-yourself drone based installation kit.
