

Diane Haithcock

Standards Program Director
Building & Life Safety Technologies

Diane Haithcock began working for the UL enterprise in 1998 as a project engineer in fire protection.

In 2010, she transitioned to the Programs team of UL Standards & Engagement. In this capacity, she serves as chair of ULSE Technical Committees, convening panels of experts to develop and maintain consensus safety standards for the United States and Canada. The standards in her portfolio cover building materials, life safety, and physical security.

Haithcock holds a Bachelor of Science in mechanical engineering from Florida International University.
