Digital View

Making Standards More Accessible Around the Globe

Technology has long played a key role in fostering UL Standards & Engagement's commitment to public safety. Today, our organization provides real-time access to our standards — raising global awareness on safety and ensuring transparency for stakeholders everywhere.

Open View for Simple Reference

Safe, secure, and sustainable living and working environments rely on global standards that are relevant, effective, and easily available. To provide broad access to standards and other documents in line with our mission of working for a safer world, UL Standards & Engagement created Digital View.

Digital View offers an open-access view of the full library of UL Standards & Engagement's documents to any interested party — anytime, anywhere. Access is free with site registration at **shopULstandards.com.**

Businesses, regulatory, governmental bodies, and other safety-focused groups can now find, reference, and employ the entire ULSE standards library with a few clicks of a mouse.

View Our Standards and Documents

The Digital View functionality affords any global user simple access to the standards they need.

- **Simple online registration** is required to view content. Organizations can register as many users as desired.*

- Users can read over **1,700 documents**, including our most recent standards.

- **Access is view only;** users can scroll through documents one page at a time to review the most relevant sections.

- From the same site, users can purchase **digital and print copies** of the standards and other documents.

- Access is free. Digital View is available as a function tab at **shopULstandards.com**. Visit **s.ul.org/freedigitalview** for even more support and to learn how you can access Digital View.

This information is premium content, and it is important that UL Standards & Engagement understands who is accessing our copyrighted content. Your information and user behavior are protected in compliance with GDPR and applicable privacy regulations. As an independent entity, UL Standards & Engagement will not sell or give your information to other companies, including certification companies. After registering, you agree to allow UL Standards & Engagement to contact you regarding the standards you have viewed.

Accelerating Safety and Progress

With Digital View, organizations can quickly reference the important standards that impact their work:

- Manufacturers can ensure products in development follow the correct regulatory processes in order to avoid costly redesigns later.

- Businesses and government agencies can quickly check current recognized safety requirements to ensure compliance.

- Research and development professionals can streamline innovation and product development.

- Regulators have assurance that everyone can access the ULSE standards that are referenced in requirements. The functionality and transparency of this digital tool showcases our passion for making the world a safer place.

All of these items can be especially important to developing nations looking to compete in the global marketplace. Access to UL Standards & Engagement's globally relevant standards helps overcome barriers in line with our adherence to the World Trade Organization's Technical Barriers to Trade agreement principles.

Committed to a Global Perspective

Digital View's online functionality makes the tool an efficient and economical way for anyone throughout the world to benefit from access to ULSE standards, including researchers, nonprofits, nongovernmental organizations, consumers, and those in academics. Because it is complimentary and easily accessible, cost is not an impediment to viewing the standards that impact their work.

In addition, increased awareness of UL Standards & Engagement's role and the critical need for safety standards across industries will foster greater cooperation and collaboration in the standards development process among new international partners.

The full library of ULSE Standards and other documents is available using Digital View. All National Standards of Canada are provided in English and Canadian French.
