

You Could Save on Your Services

As a customer, we understand that a priority is having your water treatment system perform at its best. The current process can be costly, which is why we want to introduce our **eGuardian** remote monitoring service. eGuardian can help minimize onsite service requirements and reduce your operating costs.

eGuardian Remote Monitoring

With eGuardian, you can benefit from the cost savings compared to fully on-site services, while experiencing high reliability. eGuardian can identify proactive solutions to help reduce downtime, and add extra value to your current process.

What Value Can eGuardian Bring?

Proactive Remote Monitoring

eGuardian provides real-time monitoring* of the asset's performance and health, all done remotely by our monitoring engineer. This service can help proactively identify potential issues before they escalate into disruptions. This helps reduce the need for full-time on-site services, lowering operational costs.

* Monday to Friday from 8 am to 5 pm ET. Check with your sales representative for additional conditions.

Emergency Coverage

With an eGuardian subscription, you get access to **flat-rate emergency services**.

Predictive Insights and Planning

Get regular access to comprehensive reports on asset performance metrics, maintenance activities, and uptime statistics.

Remote Support and Troubleshooting

With eGuardian, monitoring engineers use remote access to the asset's system to troubleshoot and provide diagnostics. They can respond quickly to resolve issues remotely, minimizing the need for on-site interventions.

With eGuardian, you can save up to 40%†

† Based on reduced on-site service hours required. Estimations are based on the monthly cost at the average per-hour market rate.
