flooring surfaces™
a division of the Roppe Holding Company

○ ○ ○ YOU'RE JUST A FEW STEPS AWAY

Welcome to the exciting world of Six Degrees Flooring Surfaces™. When you select a floor from Six Degrees, you can rest assured you have selected one made from the highest quality, locally-sourced raw materials in a state-of-the-art, family-owned factory, right here in the USA. Our products are both durable and beautiful, and we take great pride in providing our customers with the best possible service and care. Innovative production technology, superior wear and scratch resistance, and our commitment to both you, our customer, and the environment are what set us apart from the rest. American made. American served.

You're just a few steps away from the high quality and high style of Six Degrees Flooring Surfaces™.

○ Premium Construction

Construction matters. Our attention to detail matters. We use only the highest quality virgin raw materials in the manufacturing of our dry back / glue down luxury vinyl plank and tile products. From our heat resistant backings to our durable wear layers, each component is carefully produced to ensure high performance and dimensional stability. No matter the application or budget, we have a product for you; and best of all, our products are all made and inventoried in our U.S. manufacturing facility located in Fostoria, Ohio.

RP545_C01 Myers Court

○ Sustainability

At Six Degrees, we are dedicated to the environment and work tirelessly to provide LVT products that are not only beautiful, but durable and eco-friendly, as well. We are proud to be a strong environmental steward and continue to work to improve upon our sourcing and production practices, offering additional satisfaction that you have selected a floor with the environment in mind.

Our Story...

It began almost 15 years ago when senior managers from the Roppe Holding Company were introduced to Nox Corporation LVT/P from South Korea. Their high quality and aesthetics impressed the RHC team, who was looking to provide their customers with a durable LVT/P flooring option. For several years, a working relationship grew between the two companies as RHC purchased flooring products made in their Korean facilities. In 2014, an opportunity to manufacture these products in the U.S. became reality...an empty factory was found, equipment was installed, staff was hired, and Nox Corporation had a partner in RHC and a new U.S. operation in Fostoria, Ohio.

Fast forward two years to April of 2016, and the Six Degrees brand was born... launched to the North American market with Made in the USA LVT/P products. In 2017, Sustainable Purchasing Leadership Council (SPLC) recognized the RHC/ Six Degrees effort with a Case Study Award on this collaborative work to onshore an international supplier.

Our Products...

We know it looks odd to say "no recycled content" in the LVT/P business, but that is how our products are made; with only the highest quality virgin materials, including limestone, PVC resin, non-phthalate plasticizers, films, and superior wear finishes. We know from Healthy Building Network* studies that a wide variety of ingredients have been used in vinyl flooring in the past... but that's not how we operate. Our materials are sourced in the USA, most of them regionally, and are free of asbestos, heavy metals and other chemicals of concern that can be introduced to new vinyl products through "recycled materials."

**To learn more about recycling concerns in flooring, see Healthy Building Network studies (California 2005)*

Six Degrees LVT meets the toughest emissions test we have in the USA, the GREENGUARD Gold Certification standard by Underwriters Laboratory. In this test, our products spend two weeks in a small chamber with airflow simulating that of an office or education environment. Exiting air is filtered and the material filtered is analyzed for volatile organic compounds, commonly know as VOCs. VOC levels need to be 1/3 to 1/10th of the threshold limit values to pass the GREENGUARD Gold Certification standard.

An Environmental Product Declaration (EPD) is available for our glue down LVT/P flooring products. An EPD ensures transparency in the composition of our products, how they are manufactured, and how they go to market. You, as the customer, can rest well knowing you are selecting a flooring product free of contaminants and harmful chemicals...one that is manufactured in the USA using regionally sourced raw materials, and once produced, a product that ships from our warehouse to your door.

The Six Degrees of Sustainability...

- Our floors are 100% recyclable after use, which means even when your life with the floor is complete, a new product can be created...and that means less waste in landfills.
- Proudly manufactured in the USA. Less transport and fuel costs are needed to get your new flooring to you, our valued customer.
- Our products do not require an additional finish, which means less chemicals, less water and less energy are needed to maintain them and keep them looking beautiful.
- Six Degrees uses only 100% virgin vinyl materials. There is no recycled content and therefore no need to worry about contaminants in your flooring.
- Only non-phthalate plasticizers are used in the production of our floors. Six Degrees was the first in the industry to make this important change.

Radius™ COLLECTION

The Radius™ Collection offers a wide selection of wood and stone visuals to fit any aesthetic need. It is the ideal flooring product for a variety of applications, including, but not limited to, corporate and medical office spaces, retail and residential. And now with our NEW Radius 2.0 20 mil format, you have even more options to meet your design needs. Our durable wear layer topped with a UV-cured ceramic-reinforced polyurethane finish provides maximum durability while ensuring long lasting beauty without the use of an on-site finish. Proudly made in the USA, the Radius™ Collection is produced and inventoried for quick turnaround times. With a variety of complementary color selections and patterns, you're just a few steps away from durability and beauty in one affordably priced package.

The Six Degrees of **Radius™** VINYL FLOORING

- A designer-inspired palette of colors and patterns, all at a single price point
- Enhanced performance and durability made possible by the addition of our Ceramic Reinforced Urethane (CRU)
- A lower-maintenance flooring option which does not require a finish
- An eco-friendly product made from locally sourced raw materials
- Simple glue down installation allows for greater pattern/design flexibility
- Readily available...made and inventoried in the USA!

With a variety of style options and the eco-friendly nature of Radius™, you're just a few steps away from *a floor that delivers the utmost in design and performance.*

FEATURES

HC High Contrast VISUALS

Many of the Radius visuals are high contrast visuals, and therefore not all colors and/or textures represented in the full design will be visible in this brochure. Items marked with the **HC** symbol are considered high contrast. We suggest visiting www.sixdegreesflooring.com to view full size room scene visuals of these designs. You may also email support@sixdegreesflooring.com to order full-size samples.

Radius™ 2.0 NEW

Our NEW Radius™ 2.0 2.5 mm/20 mil format was created with Main Street commercial business in mind. With a heavier ceramic reinforced wear surface than our classic Radius, Radius 2.0 is a perfect choice for a variety of commercial installations including, but not limited to, office buildings, churches, and boutique retail. More variety means you have more choices to fit your budget and wear needs.
