

A modern interior space featuring light-colored wood paneling on the walls and ceiling. Large windows offer a view of a city skyline at dusk. A green tufted armchair is positioned on the left, and a wooden console table with decorative objects is in the center. A dark wooden cabinet stands on the right. The floor is covered in light-colored wood planks.

## SUPERIOR **STABILITY**

Featuring an AB-core structure, the Artesian Woods Collection offers enhanced dimensional stability. The innovative five-roller co-extrusion process seamlessly molds the layers, reducing vertical deflection and improving overall stability, making it ideal for residential, multifamily and commercial applications.

## ECO-FRIENDLY

Made from PVC and natural stone powder, this collection is free from radioactive elements and harmful gases. The plastic molding process ensures zero formaldehyde release, providing a phthalates-free and environmentally safe flooring solution.

## 100% **WATERPROOF**

The Artesian Woods Collection is completely waterproof, with no affinity for water due to its main components of PVC and stone powder. It resists mildew in wet conditions, making it a reliable choice for areas prone to moisture.

## HIGH FIRE **RESISTANCE**

With a fire resistance rating of up to B1 level, second only to marble, the Artesian Woods Collection doesn't burn and helps prevent the spread of flames. It does not generate toxic gases in the case of a structure fire.

## ANTI-SKID **SURFACE**

Designed for safety, this flooring features a super anti-skid surface. Compared to ordinary flooring materials, it offers stronger foot friction, reducing the risk of slipping even on wet floors.
