WHAT WE DO

We are a full-service team that supports an extensive flooring product mix. We help with installation questions and substitutions when needed. As a team we strive to exceed your expectations in all facets, from selection to execution.

OUR CLIENTS

- Interior Designers
- Architect
- Developer / Owners
- Property Management
- Flooring Contractor
- General Contractor

EXPERTISE IN

- Color & Construction
- Sound Abatement
- Moisture Mitigation
- Customization Solutions
- Sustainability Requirements

YOUR GOALS IN MIND

We provide solutions to meet the owner's needs for design concept, assembly requirements, sound abatement, budget, and contractor schedules.

BUDGET

We can find you an endless array of quality flooring solutions to meet any project budget.

TECHNICAL SERVICES

Our Technical Services Specialists provide pre-construction site consultations and are available to help navigate installation challenges and sundry solutions. We will also provide proper care and maintenance protocols.

PRODUCT REVIEW AND PROJECT SCOPE

Lean on our expertise when trying to decide what the best solution could be for your project. We are here to help, starting with design concepts and project parameters all the way through completion and installation.

SYSTEM WARRANTIES

Project-specific System Warranties are available from our installation specialists to ensure the proper sundries are used to protect your client's investment.

PLATFORMS

LUXURY VINYL

The Platforms Program was developed with our clients in mind. We aim to provide bespoke flooring solutions for all your project needs. Either customize our existing LV collections or design something unique. We've made a simple form to create a floor that will meet your design and performance with a simple process to navigate our custom program. The following pages will walk you through our Platforms Program.

We make it simple! Follow these steps with our online form and receive your specification as a PDF via email.

Scan the QR Code to get started.

PLATFORMS
LUXURY VINYL

Platform SPC, 5.0 mm, 20 mil

Construction	Rigid Core / SPC (wood)
Classification	ASTM F1700, Class III, Type B
Attached Pad	Yes
Dimensions (nominal)	9 x 60 inches
Overall Thickness	5.0 mm (includes 1 mm pad)
Wearlayer Thickness	20 mil
Finish Coat	Polyurethane
Texture	Overall emboss
Edge Profile	Square Edge

Installation
Click/Floating/Angle

Warranty
10 years Multi-Family
Adhesive

Project Information
Project Name: Sample Project
Project Address: TBD
Project Date: 11/26/2022
Notes:

PRODUCT: PLSPCS.0
COLOR: #NORTHERN

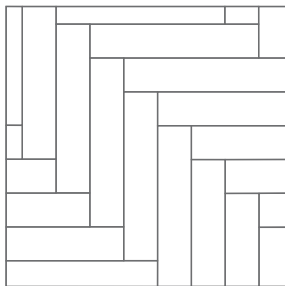

Additional Specifications, Full Instructions

1. CHOOSE VISUAL

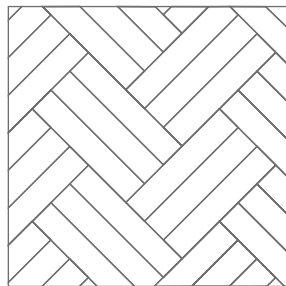

To pare down the styles and colors, we start by asking if you're looking for Wood or Stone | Concrete.

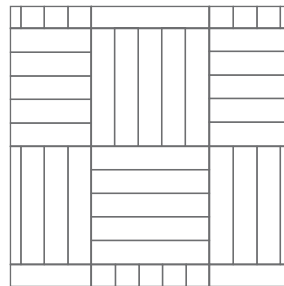

Our Luxury Vinyl flooring can be arranged in various patterns, increasing the design options for plank and tile flooring. Glue Down and Rigid Core Locking Systems can be ordered specifically for Herringbone and Parquet layouts. Please get in touch with your A&D representative for more information regarding size recommendations and limitations.

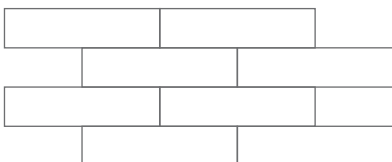

HERRINGBONE

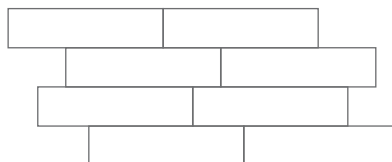

TRIPLE HERRINGBONE

FIVE PLANK PARQUET

ASHLAR

STAGGER

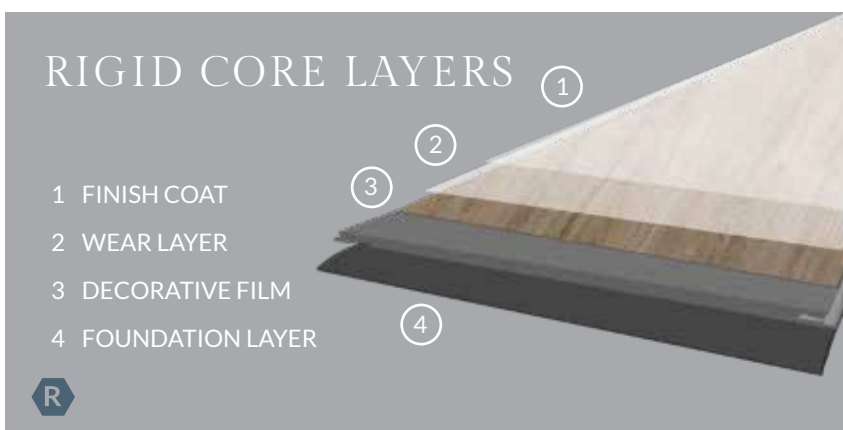

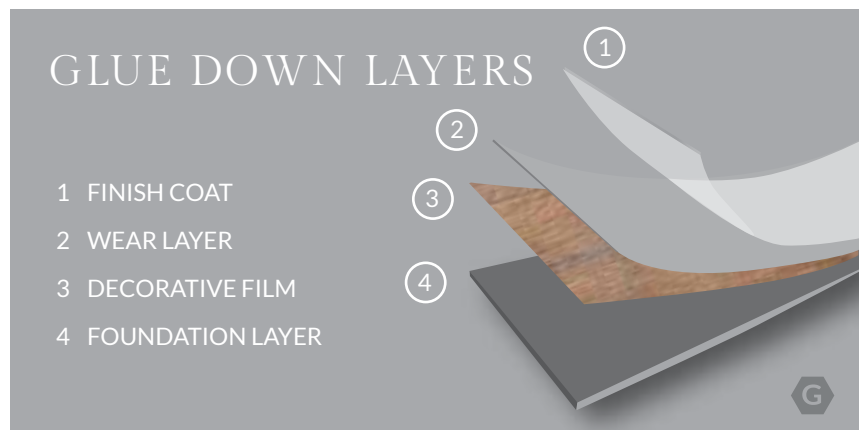

2. SELECT CONSTRUCTION

Next, choose which construction makes the most sense for the project. Usually, this is determined by how the product can be installed and the project performance needs. Choose from either Glue Down Luxury Vinyl or SPC Rigid Core with a click locking system and attached pad.

Glue Down Luxury Vinyl flooring is the lowest material cost option. Better suited for installations with concerns over expansion space and/or subfloor undulation. Also recommended for heavy foot traffic and rolling loads.

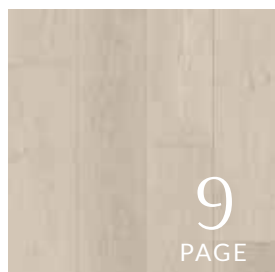

Rigid Core SPC, Stone Polymer Composite is made by combining limestone, polyvinyl chloride, and stabilizers that form a more rigid construction that locks together.

Best suited for spaces wanting sound deadening properties and faster installation without the use of adhesives.

3. CHOOSE THE FILM COLOR

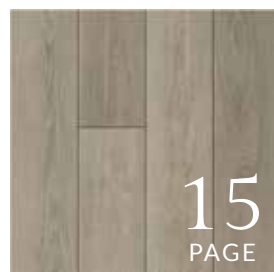

Select a film color from our vast online Platforms film library. We understand that seeing the film on screen isn't the same as seeing it in person so we have samples of all our Platforms films available to ship directly to you.

Below is the table of contents, arranged by color group, to help you navigate our catalog. But this is just the beginning of our options. View tascontract.com/platforms to see additional film colors.

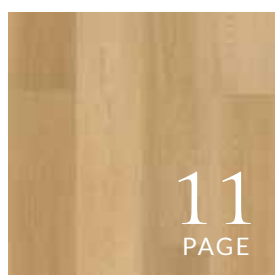

LIGHT

Create a bright and airy space with Light flooring options. Ideal for areas you want to feel clean and fresh.

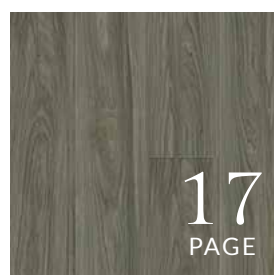

COOL GRAY

Cool Gray floors can make a room open and airy in either stone, concrete, or wood visuals.

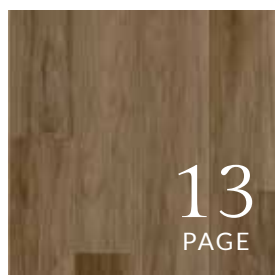

NATURAL

Bring nature in with Natural flooring colors. Add elegance, beauty, and a sense of calm to any space.

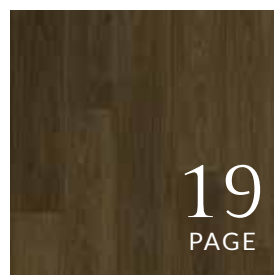

WARM GRAY

Create a cozy color scheme with a Warm Gray backdrop to your space. These floors tend to hide dust more than some darker options.

WARM

Elegant, modern, and rustic. Warm floors are all about earth tones that bring out the best in every space.

DARK

With warmth and ambiance, Dark flooring brings richness and drama to any room. The layer of deep warmth will make other finishes stand out.

SLOOP

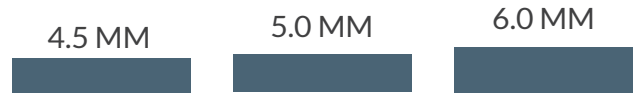

4. CHOOSE THE FLOOR THICKNESS

Thickness is defined by the distance between the base of the board and the top. The thicker the board, the more expensive it becomes. Thicker products can also hide more subfloor imperfections than thinner products. What you choose will depend on your installation needs and pricing parameters.

Glue Down Standard Thickness Options

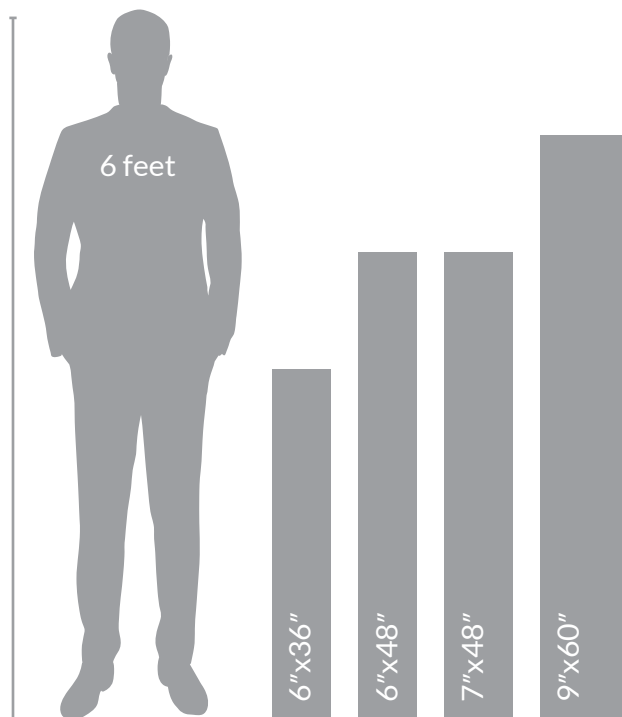

SPC Rigid Core Standard Thickness Options

5. CHOOSE THE PLANK OR TILE SIZE

All wood patterns are scaled to be cut into planks, but many stone, concrete, or abstract colors are available in tile sizes and/or planks. The films dictate the available sizes.

PLANK SIZES

TILE SIZES

6. CHOOSE WEAR LAYER THICKNESS

The wear layer of luxury vinyl is the protective top layer above the film that provides durability, stain, and scratch resistance. Wear layers typically range from 6 to 30 mils. We offer a variety of thickness options that can meet any project need whether it's based on performance or budget.

8 MIL

12 MIL

20 MIL

28 MIL

7. CHOOSE FINISH COATING OPTION

We offer two finish coating options to finalize the process.

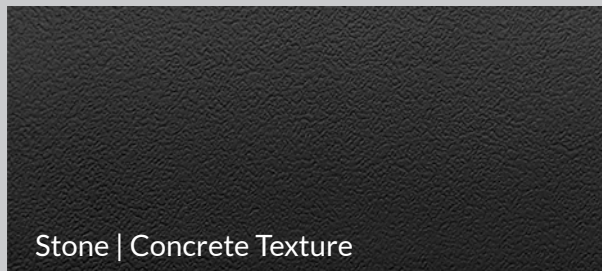

UV Cured Polyurethane

The UV Cured Polyurethane is the most common type of finish. It is applied at the factory over the wear layer and cured via a chemical reaction triggered by ultraviolet (UV) light.

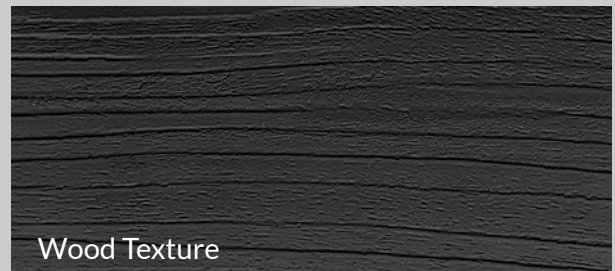

Ceramic Bead Enhanced Polyurethane

Our Ceramic Bead Enhancement combines tiny ceramic beads with the polyurethane coating to offer a higher resistance against scratching and scuffing.

Most common Textures

Stone | Concrete Texture

Wood Texture

8. REQUEST A SYSTEM WARRANTY FOR YOUR PROJECT

TAS Contract offers a project-specific Flooring System Warranty on a per-project basis.

Our System Warranty can include two or more options; Flooring, Adhesive, Primer, and Subfloor Leveling/Patch. This provides clients with added security and peace of mind that our team will be your direct point of contact and partner for up to one year after the flooring installation.

Please find out more about our System Warranty online or contact your representative.
