

LAGUNA PLANK

PREMIUM HARDWOOD

Thermal Enhanced 7/16" European White Oak

Enhanced Quality

The thermal enhancement is a natural, eco-friendly heat process applied to the wood that removes organic compounds from the wood cells. This process enhances the natural color and stain of the hardwood creating uniquely beautiful floors. The high heat also produces a naturally durable wood that is permanently resistant to water, insects, and decay, therefore is more structurally reliable than traditional hardwood products.

Specifications

Dimensions: (Nominal) 7/16" thick x 6.5" wide x multi-length up to 67"

Construction: Engineered European White Oak, 1.5mm Sliced Veneer over Engineered Multi-Ply Core

Finish: Low Gloss, UV Cured Urethane Coating

Texture: Thermal Enhanced, Brushed
