

V1-D4 Professional hygrometer

Professional universal hygrometer

PRODUCT DESCRIPTION:

Designed for moisture measurements of subfloors

ACCESSORIES:

83665	Air sensor with cable CS-10
73618	Brush electrodes set BE-03
73619	Flat electrodes set FE-04
73772	Pinhead measuring electrode PP-05
73773	Air sensor with cable CS-06
73775	Sealable sleeve for air sensor
73774	Resistor measured sample (Set) CE-07

TECHNICAL SPECIFICATIONS:

Weight	0.6 kg
--------	--------

PRODUCT BENEFITS/FEATURES:

- ▶ Non-destructive moisture measurement process while maintaining high accuracy of the measurement result
- ▶ Easy handling of the instrument
- ▶ Real-time display of the measured values on the easy-to-read display
- ▶ Suitable for preliminary testing of the readiness of building materials for CM measurements
- ▶ Intuitive operation
- ▶ Connection possibility for various measuring probes
- ▶ Soft touch housing
- ▶ Power supply: Battery, 2 x AA 1.5 Volt
- ▶ Operating temperature range: 5 °C up to 40 °C
- ▶ Available scales for substrates: Concrete, cement, anhydrite, relative scale, IR surface temperature sensor, 15.3 scale/digits

Restrictions:

The V1-D4 hygrometer cannot detect and measure moisture over electrically conductive materials such as sheet metal coverings, ethylene propylene rubber coverings, or wet surfaces. In addition, it is not suitable for measuring concrete floors with ground coverings such as wood.
