CLUTCHCOURT

Everything we do, and the way we do it, is aimed at making the process easier for you. We focus on ensuring your experience is memorable and hassle-free.

We understood long ago that a successful sports surface relies on a quality product installed by a quality team.

We've built our ClutchCourt series by combining the best systems with the best people and partners. You can trust the renowned quality of ClutchCourt and the extensive experience of our team.

The maple hardwood in our ClutchCourt Series is supplied exclusively by world-class producer, WD Flooring.

We're ready to partner on your next project.
Let's get started!

**TARKETT SPORTS IS A WORLD LEADER IN ATHLETIC SURFACING,
OFFERING A COMPREHENSIVE PORTFOLIO OF INDOOR AND OUTDOOR SPORTS SURFACES.
OUR MISSION: TO OFFER SUSTAINABLE SPORTS SURFACES
THAT MAKE THE DIFFERENCE FOR ATHLETES.**

TARKETT SPORTS BRAND

Tarkett Sports is a world leader in athletic surfacing, offering a comprehensive portfolio of sports flooring solutions through its brands: FieldTurf, Beynon Sports, Renner Sports, Tarkett Sports Construction, Tarkett Sports Indoor, FieldTurf Landscape, and GrassMaster.

DESIGN & CONSTRUCTION EXPERTS

Tarkett Sports and our partners are some of the most experienced and knowledgeable teams in the industry. We are the experts when it comes to the design and construction of your sports surface.

FINANCIALLY STRONG

The Tarkett Group is a worldwide leader of innovative flooring and sports surface solutions. Tarkett Sports Indoor is backed by unprecedented financial support and stability. You can rest easy.

LEADING DURABILITY

Manufactured and installed with the highest attention to detail, Tarkett Sports Indoor's systems showcase proven durability.

EXPERIENCE

With over 10,000 installations in North America in the last 10 years, Tarkett Sports Indoor has the knowledge and expertise to make your sports facility a success.

TRUSTED

Tarkett Sports Indoor offers some of the most trusted sports flooring solutions for a variety of applications and programs.

ENDLESS PURSUIT OF INNOVATION

From ClutchCourt wood, PolyTurf Plus Pad & Pour polyurethane, Omnisports vinyl sports flooring, the Combi-Elastic System of Lumaflex, and LinoSport linoleum, our innovation and versatility extend beyond just sports. We're here to support your team.

SERVICE

We are as committed to your program as you are, and we're with you for the long term. When you buy from Tarkett Sports, you're buying from a company that knows how to take care of you.

I can only speak amazing things about the newly installed ClutchCourt Performance floor at Golden Ticket Sports Centre in Moose Jaw, Saskatchewan. From a high-performance standpoint, it is unlike any floor we have played on. From the college and university athletes, all the way to grassroots youth - the floor does it all. In both look and performance, the floor sets us apart from other sport centres in Western Canada.

TANNER BRIGHTMAN
CEO/CO-OWNER
GOLDEN TICKET SPORTS

UNDERSTANDING SPORTS FLOORING

To help guide you to the right system for your facility, we rely on the independent sports flooring standard, ASTM F2772. This way, you can better evaluate and compare similar systems. Let's focus on the facts and cut out the noise.

HOW DOES THE SPORTS FLOORING STANDARD WORK?

It focuses on four critical areas:

1 FORCE REDUCTION (SHOCK ABSORPTION)

Force reduction (also called shock absorption) evaluates a surface's ability to reduce impact force. The standard has set a minimum value of 10% force reduction and categorizes the range into five Classes, of which Class 5 has the highest force reduction.

2 BALL REBOUND

Ball rebound (also called ball bounce) is a mechanical property that determines a surface's suitability for basketball. It is tested according to ASTM F2117 and accounts for two parameters: performance level (average performance of test points must reach a minimum of 90%) and uniformity level (test point deviation cannot exceed 3% of the average of all tests). Ball rebound is based on the responsiveness of a ball and its interaction with the surface. It is calculated by comparing the ball's rebound height on the sports surface to the rebound height of the same ball on concrete.

This area is evaluated on a pass-or-fail basis rather than with classes.

3 VERTICAL DEFORMATION

Vertical deformation values indicate the ability of the surface to deform under load. High deformation can affect the safety of the athlete, causing instability of the foot, while low deformation may cause injuries as a result of immediate impact force.

4 SURFACE FINISH EFFECT (FRICTION)

Surface finish effect describes a surface's response to a sliding foot, typically under dry conditions. It is tested according to ASTM E303 and accounts for two parameters: performance level (testing must achieve a value between 80-110) and uniformity level (individual tests cannot vary more than 4 points from the average value).

THE MAPLE HARDWOOD USED IN OUR CLUTCHCOURT SERIES IS SUPPLIED EXCLUSIVELY BY WORLD-CLASS PRODUCER WD FLOORING

For over 120 years, WD Flooring has embraced a meticulous selection process, sourcing their exceptional timber from the lush forests of Laona, Wisconsin. With thousands of acres under their careful management, each tree is hand-picked, ensuring that only the most exquisite materials grace your court. The pursuit of excellence extends beyond aesthetics, as WD Flooring is deeply committed to sustainability. The facility is fully committed to leaving no waste behind, embodying a harmonious synergy between quality craftsmanship and environmental responsibility.

WD Flooring, a proud member of the Maple Flooring Manufacturers Association (MFMA), is named in honor of William D. Connor. Widely known as W.D., he was not only a trailblazing lumberman but also served as the Lieutenant Governor of Wisconsin from 1906 to 1908. His pioneering spirit revolutionized milling and forestry practices, earning him a place of honor in both the MFMA and the Wisconsin Forestry Hall of Fame.

With five accolades under their belt as the 'Floor of the Year' by the National Wood Flooring Association (NWFA), WD Flooring continues to uphold the legacy of W.D. Connor by delivering top-quality hardwood flooring that is truly a cut above the rest.

MAPLE HARDWOOD IS THE LEADING WOOD CHOICE FOR COURT SURFACING

Due to its dense and tight grain structure, hardwood maple is highly resistant to splintering or cracking, offering leading durability and aesthetics. The material exhibits natural antimicrobial properties, inhibiting the growth of microorganisms and making it a desirable choice for hygiene-sensitive environments.

The hardwood maple manufactured by WD Flooring is meticulously manufactured to meet the highest industry standards set by the MFMA.

The inherent beauty of a hardwood maple floor lies within natural characteristics, forging a deep connection between humanity and the splendor of nature. It is a visual feast that not only delights the eye but also resonates with the very essence of our shared existence with the natural world.

Being a natural product, hardwood maple exhibits natural color variations and markings such as knots, burls, and streaks which represent minerals absorbed from the soil and other beautiful characteristics. The grade of maple flooring, whether first grade, second grade, or third grade, is determined by the amount of color variation and character present on the wood's surface.

SELECTING THE RIGHT GRADING

FIRST GRADE:

First grade maple adheres to the strictest appearance and quality standards. It must be free of defects that would significantly mar the finished floor's appearance. Slight natural color variations are allowed, along with occasional pinhole knots smaller than 1/8 of an inch in diameter, excluding ends or edges. Streaking from the bark is prohibited, and there is less tolerance for dark spots compared to second and third grade maple. First grade maple, with its bright appearance, is often chosen for professional arenas, televised sports, and competitive gyms at high schools and colleges, albeit at a higher price point.

SECOND GRADE:

The most popular option, second grade maple permits tight knots in the wood as long as they do not occur on the ends or edges of the boards. Natural variations such as dark spots and streaks are allowed, excluding heartwood, which may appear darker due to staining from minerals stored in the cambium of the wood.

THIRD GRADE:

Third grade maple showcases natural variations, resulting, simply, in a more uniquely finished product. While it allows for all the natural nuances found in wood, the boards must still be structurally sound, with no voids on the ends or edges and no knot holes larger than 3/8 of an inch in diameter. Imperfections affecting the floorboard's serviceability are removed during the milling process. Many facilities opt for third grade maple because the natural variations add character to the gymnasium without impacting performance.

NEW!

**A MASSIVE
IMPACT
YOU CAN
FEEL GOOD
ABOUT**

Our NEW **VERT SERIES** provides your program with a truly unique floor surface experience. **VERT** is revolutionizing your traditional hardwood court with an innovative design aiming to make a massive impact, without vibration.

FIGHTING BAD VIBES

MEET VERT [VIBRATION ENERGY REDUCTION TECHNOLOGY]

By Mission V Sports, a patented engineered non-newtonian polymer pad applied to the bottom layer of the subfloor system. Available with all ClutchCourt VERT Series systems, the cushioning pads are designed to change their viscosity and flow behavior in response to pressure, helping respond quickly to force, dampening vibration in the floor while controlling the energy return to the athlete. Reducing shock before it enters the body is vital for an athlete's performance. VERT pads offer enhanced stability and load-bearing capabilities.

VERT PAD

VERT HEX PAD

US Patent No.: 10,174,509 • International Patent: PCT/US 2018/012024

- **UNMATCHED PLAYING COMFORT**
- **LEADING SAFETY & PERFORMANCE, ADDITIONAL BENEFITS FOR YOUTH & LIGHTWEIGHT ATHLETES**
- **LARGER, WIDER, & MORE ACCURATE AREAS OF COMPRESSION FORCE-DEFLECTION**
- **REDUCES MUSCULOSKELETAL FATIGUE VIA VIBRATION MITIGATION**

RESULTS THAT'LL PAD THE LEAD

A COMPLETE PACKAGE PLAYER

Tarkett Sports offers a comprehensive portfolio of solutions to equip your venue. With rubber, sports vinyl, artificial turf, polyurethane, and linoleum systems, we offer your program a complete package.

OMNISPORTS SPORTS VINYL

Applications: Gymnasium • Daycare • Multi-Purpose Rooms • Cafetorium • Yoga • Martial Arts

POLYTURF PLUS PAD & POUR POLYURETHANE

Applications: Multi-Purpose Rooms • Cafetorium • Gymnasium • Inline Skating

LUMAFLEX COMBINATION SYSTEM

Applications: Gymnasium • Multi-Purpose Rooms • Inline Skating • Aerobic & Fitness

CLUTCHCOURT HARDWOOD

Applications: Gymnasium (Basketball & Volleyball) • Aerobics • Racquetball

DROPZONE RUBBER

Applications: Weight Rooms • Strength & Cardio Equipment • Spinning • Training Turf • Functional & Extreme Training • Ice Rinks

DANCEFLOOR SPECIALTY VINYL

Applications: Dance Studio • Dance Stage

LINOSPORT LINOLEUM

Applications: Multi-Purpose Rooms • Gymnasium • Daycare

DROPTURF SYNTHETIC TURF

Applications: Recreation & Fitness

OUR SUSTAINABILITY COMMITMENT

That means our innovation isn't limited to product specs. Our promise to keep athletes safe on our surfaces has become our singular focus. In everything we do, we strive to completely eliminate its potential to harm, not just for people but for the environment too. Our commitment to creating safer surfaces means leading the industry in manufacturing indoor athletic flooring with the lowest impact on people and the planet—from Cradle to Cradle Certified™ products, to circular design, to the utmost care for those who play on and handle our products.

OUR CLUTCHCOURT SERIES IS DESIGNED USING FOREST STEWARDSHIP COUNCIL™ (FSC) ACCREDITED 100% MAPLE HARDWOOD

THE HEALTHIER CHOICE FROTHED POLYURETHANE USED IN OUR CLUTCH COURT FLEXLOCK SYSTEM IS CERTIFIED GREEN LABEL PLUS. PRODUCT COMPLIES WITH CALIFORNIA DPH SECTION 0135 VERSION 1.2

-  BUILD RESPONSIBLY
-  PROTECT THE ENVIRONMENT
-  MINIMIZE WASTE
-  SAFEGUARD ATHLETES

PROTECTING THE FUTURE OF PLAY

The power of sport has a global reach. It drives community development and collaboration, empowers youth and individuals, adds to health and education, and can help us create a more inclusive society. Through our Better Tomorrow Program, we partner with leading organizations building sport capacity, whether it's mentoring coaches or making the game more accessible, ensuring future generations continue to play.

Partners with Good Sports, who helped equip over 500,000 kids in 2022.

"The Good Sports donation changed the trajectory of [their] lives and careers moving forward. With a donation from Good Sports, the girls were provided with new shoes and training equipment. They went on to make their high-school basketball teams and are now being looked at by colleges"

- SWOOPS HOOPS FOUNDATION, GEORGIA

Partners with Make-A-Wish® Georgia, helping grant wishes for exceptional kids in Georgia.

Women Leaders in Sports partners with prominent women in the sports world who develop, connect, and champion women to advance and be powerful influences in sports.

Supported over 800 community initiatives with employees volunteering 3,500 days and almost 1.2 million dollars of product donations between 2017 & 2022 through our Tarkett Cares program.
