

### Continuous Hanger™: Explained

Rain gutters are commonly installed with spaced hangers that cause weak spots on the gutter between each hanger.

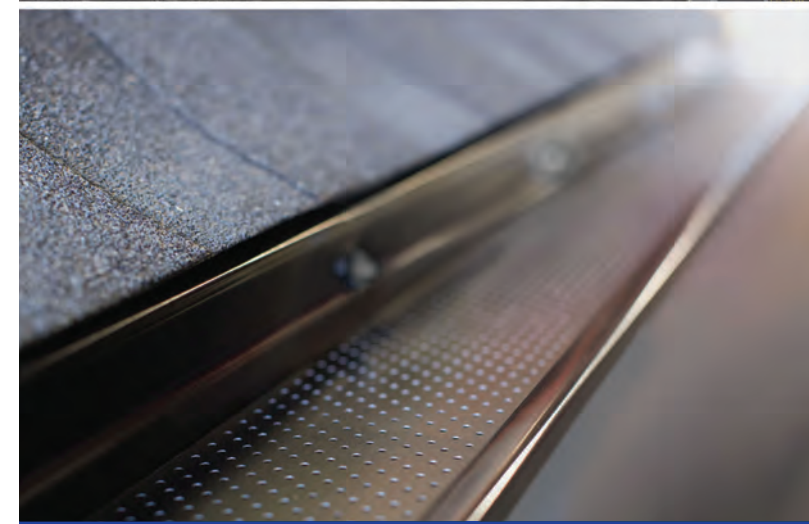

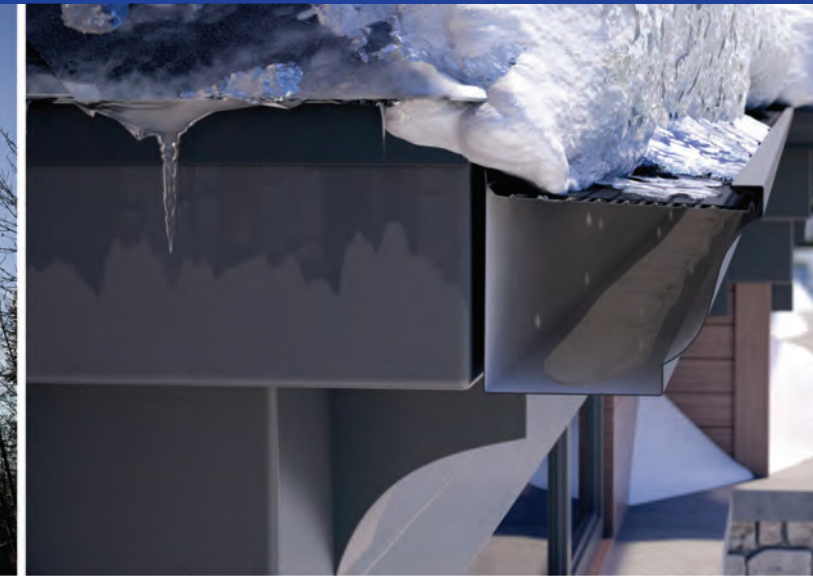

To avoid weak spots, hundreds of hangers would need to be added, but this is not a very efficient practice.

With a continuous hanger™, the rain gutters are reinforced along their entire length.

### CONTINUOUS HANGERS™ AT A GLANCE

	DUAL DEFENSE DOUBLEPRO®	T-REX®
	For new gutters surrounded by a lot of trees	For new gutters surrounded by little or no trees
Support at least 250 lb per linear foot	✓	✓
Replace spikes and hangers as gutter fastener	✓	✓
Assemble with the gutter on the ground	✓	✓
Protect gutters from pine needles	✓	
Protect gutters from leaves and debris	✓	✓
Can handle at least 29.7" of water per hour	✓	✓
Reduce problems with ice and snow	✓	✓
Warranty on material	LIFETIME	LIFETIME
Warranty on sturdiness	LIFETIME	LIFETIME

# DUAL DEFENSE DOUBLEPRO® GUTTER SYSTEM

# T-REX® CONTINUOUS HANGER™ GUTTER SYSTEM

**eclipse™ TECHNOLOGY**  
The offset holes make it the perfect filter, allowing water to drain freely while blocking pine needles and leaves without ever getting clogged.

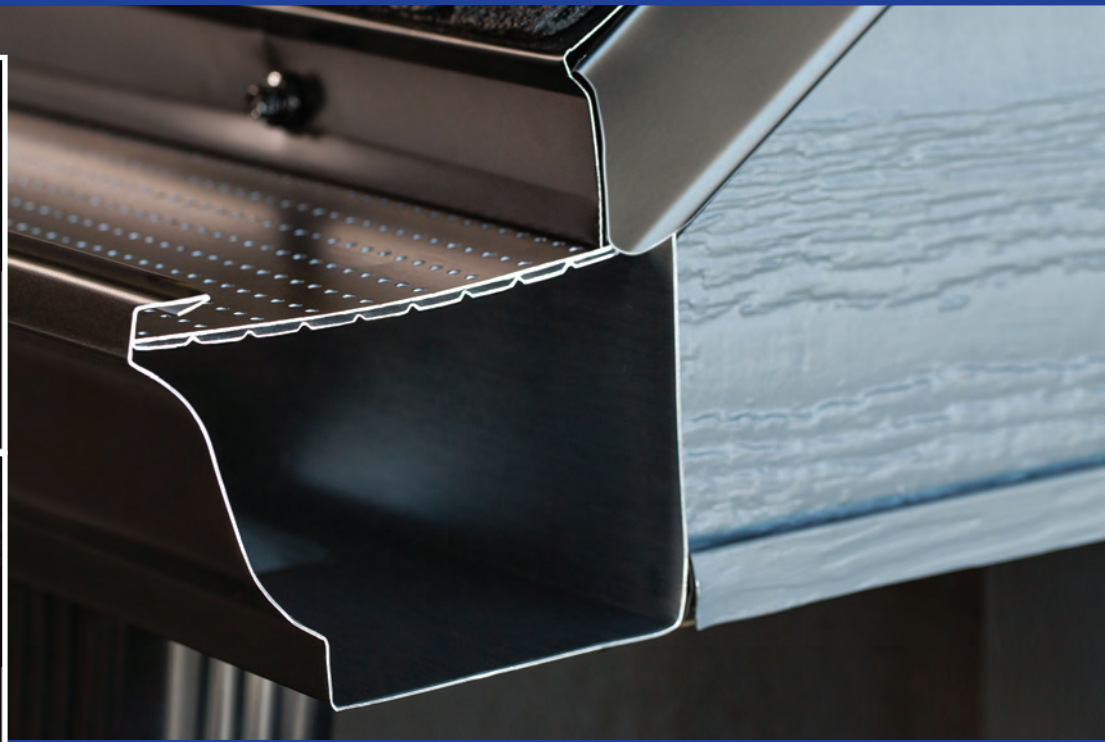

**vortex™ TECHNOLOGY**  
The suction created by the two membranes makes it possible to drain three times more water than recorded in the heaviest storms.

**winter shield™ TECHNOLOGY**  
Stops ice from building up and in the gutter, protecting it from warping caused by freeze/thaw cycles. The water flows through the gutter rather than into your home.

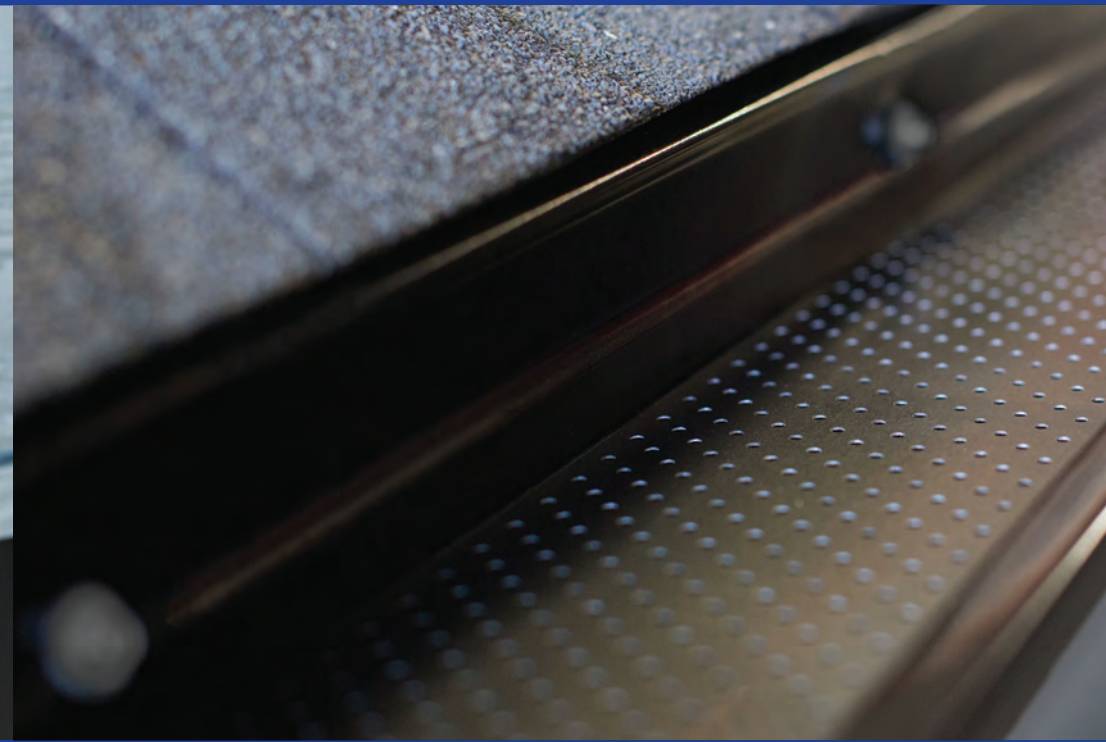

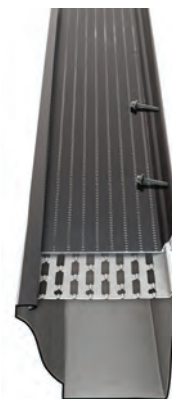

**The rollback™ TECHNOLOGY**  
Sends excess rainwater back into the gutter for truly high-volume drainage capabilities.

Dual Defense DoublePro® is a patented dual-action gutter protection system. This continuous hanger™ with built-in guard is designed to stand up to the worst weather conditions in North America and keep your gutter free of debris and ice year after year.

Take advantage of the most advanced technology on the gutter market with the Dual Defense DoublePro®. The dual-layer microfiltration continuous hanger strikes an ideal balance, offering maximum drainage and debris filtration. The Dual Defense DoublePro® only lets through what the gutter system should carry off: fine dust particles, pollen, and (of course) rainwater. As an added bonus, it provides extra support because it runs the entire length of the gutter.

The 360° lifetime warranty gives you unparalleled peace of mind; a lifetime warranty on materials, durability, and clog-free performance. Dual Defense DoublePro® is the only gutter guard whose clog-free warranty covers pine areas.

The T-Rex® is also a continuous fastening system for gutters. It mounts rain gutters solidly on houses, making them much sturdier and longer-lasting than those mounted with spikes and hangers spaced at intervals.

The T-Rex® Continuous Hanger has gradually replaced hanging systems that use nails and spaced hangers. A continuous fastener like the T-Rex® is strong along the entire length, offering better support to keep the gutter from being warped or torn off due to heavy snow and ice accumulations. This product also provides protection against leaves, samaras (helicopters), tennis balls, and other objects that can block your gutters.

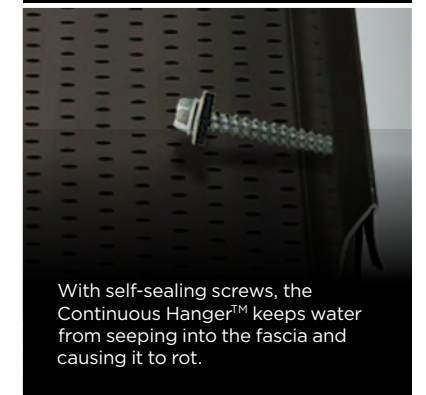

The T-Rex® comes with a lifetime manufacture and sturdiness warranty in addition to a 25-year clog-free warranty.

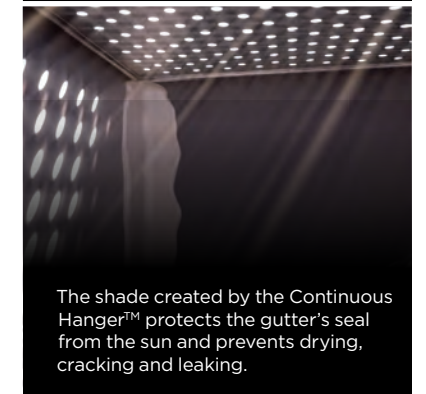

The Continuous Hanger™ extends the life of your gutters by delivering unparalleled strength.

It blocks ice and improves drainage to keep gutters clear year round.

With self-sealing screws, the Continuous Hanger™ keeps water from seeping into the fascia and causing it to rot.

The shade created by the Continuous Hanger™ protects the gutter's seal from the sun and prevents drying, cracking and leaking.
