ENERGY PERFORMANCE, COMFORT, AND SAVINGS

With the right glass package for your home and region, you can conserve energy, reduce heating and cooling costs, and keep your home comfortable throughout the year. Advanced options allow you to customize your window for maximum energy performance and comfort.

- A** **INSULATING GLASS UNIT**
Window World 6500 series come standard with Energy Star approved dual pane insulated glass, choose optional triple pane insulated glass for maximum performance
- B** **LOW-E GLASS**
Standard All-Season Low-E glass can be upgraded to a high-performance regional Low-E glass option for optimal performance from the warmest to the coldest climates.
- C** **GAS FILL**
Standard Argon gas, 6x denser than air, is placed between the glass panes to reduce temperature transfer.
- D** **WARM EDGE SPACERS**
The standard Intercept® spacer system features a U-channel design that keeps glass warmer while flexing and contracting to reduce seal failure. For increased durability and thermal efficiency, choose the Intercept® stainless steel spacer. Alternatively, opt for the non-metallic foam Super Spacer®, which resists temperature transfer and further increases energy efficiency.
- E** **INSULATED CHAMBERS**
Choose high-density foam insulation placed in the window cavities to help prevent cold air transfer. This insulation provides almost two times the insulating properties of typical fiberglass insulation.

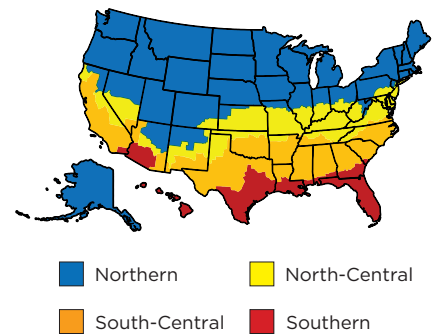

THERMAL PERFORMANCE

Windows are tested for energy efficiency by assessing the U-Factor and Solar Heat Gain Coefficient (SHGC). The U-Factor measures heat gain or loss through glass. The SHGC measures how much of the sun's heat the glass allows into a home. For both indications, lower numbers mean greater energy efficiency.

SolarZone® Glass Packages	U-FACTOR* (US/I-P)	SOLAR HEAT GAIN COEFFICIENT* (SHGC)
SolarZone Dual-pane, Sun Control Low-E Glass, Argon Gas, Intercept® Spacer	.30	.21
SolarZone Elite Plus Dual-pane, Sun Control Low-E Glass, Argon Gas, Super Spacer®	.29	.21
SolarZone SF Plus Dual-pane, Sun Control Low-E Glass, 4th Surface Interior Low-E Glass, Argon Gas, Super Spacer®	.25	.21
SolarZone TG2 Plus Triple-pane, Two Surfaces of All-Season Low-E Glass, 4th Surface Interior Low-E Glass, Argon Gas, Super Spacer®	.21	.23
SolarZone TG2 Plus w/Foam Dual-pane, Triple-pane, Two Surfaces of All-Season Low-E Glass, 4th Surface Interior Low-E Glass, Argon Gas, Super Spacer® and Foam Insulation. Meets ENERGY STAR Most Efficient for all climate zones.	.19	.23

*Numbers reflect simulated testing on a standard Double-Hung window without grids. Thermal numbers may vary per window style and size.

6500 Series
Twin Double-Hung Windows
in White

DOUBLE-HUNG WINDOWS

Classic style with great functionality. Both sashes open for ventilation and tilt in for easy interior cleaning—essential for multilevel homes. Our Double-Hung is an ideal window style that won't impede exterior walkways or patios when open.

Vent Latches

Limit the amount a window can be opened for safer ventilation.

Multi-function Lock Upgrade

Eliminates tilt latches for a clean, refined aesthetic and allows you to lock and tilt your window with one simple motion.

Recessed Locks

Create a streamlined look, and tilt latches allow for easy interior cleaning.

Interlocking Sashes

Overlap to help eliminate air infiltration when the window is closed (shown with optional insulated core).

Sturdy Core Reinforcement

Available to enhance the strength and durability of the meeting rail.

6500 Series
Sliding Window
in Black Laminate

SLIDING WINDOWS

Offers great views and ventilation. Both sashes on Double Sliding window glide open to left or right. The End Vent Sliding window is a three-lite configuration with a fixed center window and operable end vents.

Integrated Pull Rails

Allow you to conveniently open and close your window.

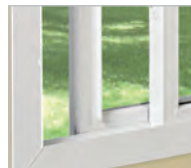

Ventilation Latches

Limit the amount a window can be slid open for safer ventilation.

Roller System

Enables smooth operation of the window sash.

Interlocking Sashes

Overlap to help eliminate air infiltration when the window is closed.

Added Reinforcement

Available to enhance the strength and durability of the meeting rail.

6500 Series
Casement Windows
in White

CASEMENT, AWNING, AND HOPPER WINDOWS

Hinged window styles that complement both contemporary and traditional homes. Casements open outward with a turn of a handle for maximum venting. Awning windows are hinged at the top and open out and up with a convenient crank handle. Hopper windows are ideal for basements. They are hinged at the bottom and open inward from the top to increase ventilation and natural light.

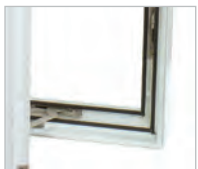

Fold-away Crank Handles

Easily open the sash and then fold neatly into the base for a streamlined appearance that won't interfere with blinds.

Dual Bulb Seal

Creates a strong barrier against prevent air infiltration and increase energy efficiency.

Multi-point Locking System

Secures your window sash at multiple points for excellent weather resistance.

YOUR GUIDE TO CUSTOMIZATION.

Make each window and patio door your own with a wide range of style options. Whether you want to match your home's current style or create a bold new look, the right style selections can go a long way. Open a world of design possibilities with Window World 6500 Series styling options.

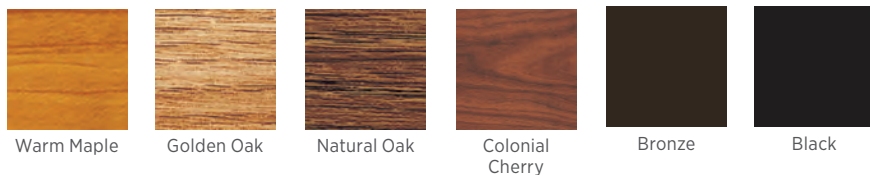

INTERIOR/EXTERIOR VINYL COLORS

Vinyl colors are molded throughout the profile for long-lasting beauty with virtually no maintenance.

INTERIOR LAMINATES

Transform your home with the warmth of a woodgrain laminate or stylish bronze or black interior laminate. Woodgrain laminate interior comes in white, beige, or an exterior color. Black and bronze laminate interior available in white or color-matched coextruded exterior.

EXTERIOR CO-EXTRUDED COLORS

Enhance curb appeal with co-extruded colors applied to the vinyl during production for enhanced durability and appearance. All colors are available with white interiors. Black and bronze are also available with color-matched laminate interiors.

EXTERIOR COLOR COATING

Choose from a distinctive range of colors with a heat-reflective exterior coating that resists fading. Available with white or beige vinyl interior or a woodgrain laminate interior.

TRIM ACCESSORIES

Give your installed window a polished look with our matching trim and jamb extensions.

WINDOW SCREENS

Our Double-Hung and Sliding windows feature extruded aluminum half screens with fiberglass mesh that can be upgraded to a full screen. The optional FlexScreen is designed to spring into the window opening for effortless installation and removal of your screen.

Available in Primed Pine, Clear Pine, Cellular PVC, and Interior Moulding (Interior moulding in Golden Oak, Natural Oak and Colonial Cherry).

Colors are reproduced as accurately as print technology allows. Before making your final selection, please see your Window World representative for actual samples.

GRID PATTERNS

From traditional to contemporary, choose from our wide selection of grid options to highlight your home's architectural style.

Additional and custom patterns available

GRID TYPES

Choose from a selection of grid options to highlight your home's architectural style. Between-the-glass grids provide a smooth surface that makes your windows much easier to clean. Simulated Divided Lites (SDL) are mounted on the outside of the glass, creating a more traditional look.

5/8" Flat

11/16" Contoured

7/8" Simulated Divided Lite

If you live in a noisy area, ask about specialty glass designed to reduce unwanted noise infiltration.

WINDOW HARDWARE FINISHES

Our windows have color-matched hardware or you can select a metallic finish to complement the other fixtures in your home. Double-Hung and Sliding windows feature recessed sash locks. Double-Hung windows can upgrade to the multi-function lock for a streamlined appearance with no tilt latches. Casement and Awning windows come with nesting crank handles.
